
3 columns FBLatest

Posted by oldsteel68 - 2007/10/23 05:49

Can someone tell me how to change the FB Latest module to a 3, or possibly 4 columns? Im sure it shouldnt be hard. Looks like its only one file. mod_fblatest.php...If anyone has the time I would greatly appreciate it. Looks pretty silly with only half of a horizontal module filled.

Thanks
-Mike

anyone? Im pretty sure its something within here that needs to be changed..

```
// Generate item layout
$content = "";
if ($two_columns) {
    $col1count = ceil( count( $items ) / 2 );
    $content .= "\n";
    if ($layout_type == 0) {
        $content .= "\n";
        for ($i = 0; $i $items.\n";
        $content .= "";
        for (; $i 0)
            $content .= ".$more_text.";
    }
    echo $content;
}
```
