
Group colour legend incorrect.

Posted by dannykilla - 2007/08/05 19:40

Hi,

The group colour in the legend at the bottom of the main page is wrong, the registered user and BOJ team are both black i.e. & .

But when a registered user logs on i.e. me, then I am a light Red

Thanks
Danny

Some templates seem to adopt text colours from Joomla template. When installing a new FB template one should check if the legend is correct. If not, he should edit fireboard css file to get it work (paste parts from original default theme). Hopefully somebody finds it useful but I think you already now that. :D
