
Fireboard Poll-System RC4 release

Posted by iosoft - 2007/12/25 11:03

RC4 is now RELEASED and open to Download for ALL :lol:

NOTE: It is exclusively for Fireboard 1.0.4

If you are upgrading from BETA/RC2 edition, you don't need to go through the SQL part.... only replace the files :)

http://www.gigahertz.net.in/index.php?option=com_content&task=view&id=83&Itemid=86

(registration needed with Full Name, Site URL, Country)

Hope you will like it and Happy Christmas & Happy New Year.

=====

Re:Fireboard Poll-System RC4 release

Posted by Sven Kauffmann - 2008/01/04 14:21

How do I get this to work for guest too?

=====

Re:Fireboard Poll-System RC4 release

Posted by iosoft - 2008/01/04 20:14

Are you facing any problem ? It should work with both registered and guest users as long as you have configured Fireboard properly.

It reads the Fireboard configuration for 'permissions'.

This is great news but why does one have to register for downloads!!! I have so many dummy accounts out there with an unused email address it just seems dumb to need a person to register just for that purpose - but hey your choice :)

Cheers

Re:Fireboard Poll-System RC4 release

Posted by iosoft - 2008/01/06 14:25

Actually, I reason is different.

My forum system is for Registered peoples only.

If you register with my site and subscribe the POLL thread then it will be easy for me to post update news for all.

Hey if someone is going to "GIVE" you a "FREE" plug in program for your forum board I've never have griped about registering. I have a gmail account just for registering for software downloads where all the update messages come too. Besides, I would presume that the author of the poll program would like to offer you other great programs for a small token of your appreciation for their efforts. I've picked up several helpful programs from sources like this through the years.

Re:Fireboard Poll-System RC4 release

Posted by gwmbox - 2008/01/06 16:53

Sorry did not mean to be insulting it was merely a case of why require someone to register just to get it when that person will most probably never go back to the site or forums - I do not see the point in having 1000+ members and only 50 or so active. Please I am more than happy to register but I just think its pointless - my opinion that is all - sorry if that stirred the pot a little

Cheers

Re:Fireboard Poll-System RC4 release

Posted by grumblemarc - 2008/01/06 17:27

I guess you should've not said "it just seems dumb ". Having to resister at a site to download an add-on is quit when some update has been made. Now if you're one of those who "will most probably never go back to the site or forums" I can see why this might be an inconvenience.

'it' not the person or anyone in particular but if one is a little touchie well not my problem, one should not generalise unless they believe that if the hat fits then they are wearing it. I still think its - dare I say it - 'dumb' but again my opinion - sorry for expressing it - oops I did it again - my bad :P

I have already sent you a mail 3 hours ago, of which till now I got no reply :angry:

Its a HACK, not a plugin, nor add-on. It will not "make it easy for people".

See your KARMA.

NOTE: It is illegal to privately host my hack (files). Its not in GNU-GPL.

Re:Fireboard Poll-System RC4 release

Posted by Sven Kauffmann - 2008/01/07 12:27

Back again to "guests not able to poll":

I use jcl! Could that be the problem? I checked the files but couldn't figure out where to fix it.

As I understand the code the user with userID "0" is only allowed to poll for one time. So the next guest user won't be able to poll.

Any ideas?

Re:Fireboard Poll-System RC4 release

Posted by iosoft - 2008/01/07 12:33

^ Yes, you got it 100%.

"Guest Support" needs hell lot of added modification.

So, I may not able to add this feature at this moment as beside my office-project, I am also doing 2 mambots and gallery system.

Re:Fireboard Poll-System RC4 release

Posted by NfoCipher - 2008/01/07 12:38

>NOTE: It is illegal to privately host my hack (files). Its not in GNU-GPL.

I'm assuming your "hack" changes existing files, which are GPLed.

You'd better read up:

<http://www.gnu.org/licenses/old-licenses/gpl-2.0.html>

Anyways, if it's not GPLed, I don't need it that bad.

And fix your email server.

Re:Fireboard Poll-System RC4 release

Posted by iosoft - 2008/01/07 12:45

You are welcome to leave.

If you want GPL wait for FB2.0

BYE BYE.

Re:Fireboard Poll-System RC4 release

Posted by rcam1971 - 2008/01/14 02:53

iosoft - Great Poll software. Is it possible to see/show how many people have voted? (Either in the back end or front end?)

Re:Fireboard Poll-System RC4 release

Posted by iosoft - 2008/01/14 07:27

Just put the mouse pointer upon a BAR, it will show how many votes it got using tool-tip box.

Total vote ? not yet added.... will add in next version.

Re:Fireboard Poll-System RC4 release

Posted by grumblemarc - 2008/01/14 15:25

Attention!!!

ANY questions or concerns about confirmation emails concerning this contribution should be raised with the developer of the hack at his website. <http://gigahertz.byethost18.com/> Please contact him there since that is where you had to register FOR the hack in the first place.

You may post any issues with the hack itself in either forum but any posts concerning the non-receipt of confirmation emails will be deleted. Thank you.

=====

Re:Fireboard Poll-System RC4 release

Posted by whiskymac - 2008/01/26 01:43

Just like to say, fantastic plugin, been looking for a poll system for ages!

Just one problem I am having though. When I create a poll the process seems to work fine, but when I go into the forum post after creating it I get the following error:

```
Warning: main(www.breathemini.co.uk/joomla/components/com_fireboard/template/default/plugin/poll/showpoll.php) :
failed to open stream: No such file or directory in
/home/sites/breathemini.co.uk/public_html/joomla/components/com_fireboard/template/default/message.php on line 198
```

```
Warning: main() : Failed opening
'www.breathemini.co.uk/joomla/components/com_fireboard/template/default/plugin/poll/showpoll.php' for inclusion
(include_path='.:usr/share/pear') in
/home/sites/breathemini.co.uk/public_html/joomla/components/com_fireboard/template/default/message.php on line 198
```

The example can be seen here -

http://www.breathemini.co.uk/joomla/component/option,com_fireboard/Itemid,42/func,view/catid,41/id,2974

Any help would be greatly appreciated.

(I'm running Joomla 1.0.13 and FB 1.0.4)

=====

Re:Fireboard Poll-System RC4 release

Posted by grumblemarc - 2008/01/26 01:46

Looks like you're missing a file somewhere.

=====

Re:Fireboard Poll-System RC4 release

Posted by whiskymac - 2008/01/26 01:48

I have checked in my file manager and poll.php is present and the poll section of message.php also seems fine :dry:

Thanks for the help.

=====

Re:Fireboard Poll-System RC4 release

Posted by grumblemarc - 2008/01/26 02:57

Is it poll.php or showpoll.php? That's the file it says it cannot open/locate.

=====

Re:Fireboard Poll-System RC4 release

Posted by whiskymac - 2008/01/26 03:33

Sorry, my mistake, showpoll.php is present and correct.

=====

Re:Fireboard Poll-System RC4 release

Posted by iosoft - 2008/01/26 14:31

^ are you with pure Linux server or on IIS ?

=====

Re:Fireboard Poll-System RC4 release

Posted by whiskymac - 2008/01/26 14:47

I couldnt tell you to be sure, but I think its just linux.

I'm with heartinternet and from what I can tell its is run on "Redhat Enterprise Linux Platform" I can find no mention of IIS

=====

Re:Fireboard Poll-System RC4 release

Posted by iosoft - 2008/01/26 15:07

Do this -

Open the file /components/com_fireboard/template/default/message.php

Search for the line

```
if($poll_id>0) include_once($_SERVER."/components/com_fireboard/template/default/plugin/poll/showpoll.php"Â«Â»);
```

Change it to -

```
if($poll_id>0)
```

```
include_once("/home/sites/breathemini.co.uk/public_html/joomla/components/com_fireboard/template/default/plugin/poll/s  
howpoll.php"Â«Â»);
```

Hope this will solve the problem.

Leave feedback and karma :P

=====

Re:Fireboard Poll-System RC4 release

Posted by whiskymac - 2008/01/26 15:49

Fantastic, that did the job!

That feature pretty much completes my site now, thanks! Karma duly left.

Just one thing I have to ask, when I cast a vote, it takes me to a page which says "thank you for your vote" but when it returns to the post it still has the option to vote instead of displaying the results. You need to refresh the page in order for this to happen. Do you know if this is a bug with the poll system or in FB itself?

Thanks for all the help

Re:Fireboard Poll-System RC4 release

Posted by iosoft - 2008/01/26 16:16

No, its a CACHE problem, specially with IE.
Till couldn't able to figure out how to solve it...

Re:Fireboard Poll-System RC4 release

Posted by whiskeymac - 2008/01/26 18:37

Oh well, I can cope for now :laugh:

Re:Fireboard Poll-System RC4 release

Posted by nanaya - 2008/02/06 07:03

Im confused on this Step.. what do I need to do?

1. Open the SQL.sql file and replace 'jos_' to whatever you are using as prefix.
(not needed if you are upgrading from previous version of Poll-System.)
2. Execute this SQL.sql file through phpMyAdmin or whatever your MySQL client is.
(not needed if you are upgrading from previous version of Poll-System.)
3. Override the files under \Files_to_Replace DIR in the same tree structure given.

Re:Fireboard Poll-System RC4 release

Posted by nanaya - 2008/02/27 15:48

Can Anyone Help me.. In installing this Poll System? Im confused on the first step of installation. Previous Post.

Re:Fireboard Poll-System RC4 release

Posted by iosoft - 2008/02/27 17:40

open the configuration.php file and find a line like this -
`$mosConfig_dbprefix = 'jos_';`

It could be other than 'jos_'.
If it is 'jos_', ignore the 1st step and proceed to next steps.

ENJOY :blush:

Re:Fireboard Poll-System RC4 release

Posted by BLaCKie_MoRGaN - 2008/02/28 16:23

I got a problem with it not inserting correct content..

I am using UTF-8 charset and it shows some gibberish.. Any help on that?

=====

Re:Fireboard Poll-System RC4 release

Posted by iosoft - 2008/02/28 17:12

Actually, it only supports English.

I personally don't know how to write PHP codes that supports UTF-8 chars.

Tutorials would be very very helpful to make the 1.5 version.

=====

Re:Fireboard Poll-System RC4 release

Posted by BLaCKie_MoRGaN - 2008/02/29 12:33

i am using 1.0.15 version of joomla :p with utf charset. i will look into it on the greek forums will update on any news

UPDATE:

For utf8 support a line needed to be added

file: /components/com_fireboard/template/default/plugin/poll/fb_poll_form.php
Line 39

```
$dbname = $mosConfig_db;
mysql_select_db($dbname);
mysql_query("SET NAMES 'utf8'", $conn);
////////////////////////////////
```

Works like a charm :D

=====

Re:Fireboard Poll-System RC4 release

Posted by iosoft - 2008/02/29 18:21

Thanks man.

I will include this line in every new versions of FB-Poll System.

=====

Re:Fireboard Poll-System RC4 release

Posted by nanaya - 2008/02/29 18:43

iosoft wrote:

\$mosConfig_dbprefix = 'jos_';

It could be other than 'jos_'.

If it is 'jos_', ignore the 1st step and proceed to next steps.

ENJOY :blush:I really Appreciate you you helping me. Where do I go? Where is this configuration.php Located..then On

Step 2:

Execute this SQL.sql file through phpMyAdmin or whatever your MySQL client is.
(not needed if you are upgrading from previous version of Poll-System.)
What do I have to do in there? This is getting confusing. Please help.

=====

Re:Fireboard Poll-System RC4 release

Posted by snilloconator - 2008/02/29 19:18

I'm in the same boat... Afraid to touch this one! I have downloaded the hack but I'm afraid I'll screw something up instead of making it better.

=====

Re:Fireboard Poll-System RC4 release

Posted by BLaCKie_MoRGaN - 2008/03/03 10:58

When you installed joomla there was an option to change it. If you dont remember open the file and see what it.. the help file is pretty clear about that. if the prefix IS "jos_" then skip that step...

=====

Sorry, I can't suggest as I never used any.....

=====

Re:Fireboard Poll-System RC4 release

Posted by Toolcrazy - 2008/05/14 09:50

How the heck are you to log into your site to get this mod? :S..

Rather how are you supposed to create an account to login?

That is pretty bad, create a mod then tell us about it and not allow us to download it.

=====

Re:Fireboard Poll-System RC4 release

Posted by iosoft - 2008/05/15 10:13

Website has been changed.

Visit -
http://www.gigahertz.net.in/index.php?option=com_content&task=view&id=83&Itemid=86

Also NOTE:

This plugin is only for Joomla 1.0.x version http://extensions.joomla.org/components/com_mtree/img/compat_10.png
This plugin is only for Joomla 1.0.3 and above with Default-Template only.

=====

Re:Fireboard Poll-System RC4 release

Posted by Toolcrazy - 2008/05/16 07:08

Sorry, dude, That isn't where the first link took me. Now MediaMax is moving files and I can't download it now. The story of my life. Thanks.

=====

Re:Fireboard Poll-System RC4 release

Posted by iosoft - 2008/05/16 08:41

Sorry friend. I didn't realize the problem with MediaMax.
I actually can't login to that new website they clams :angry:

Please stand-by....

=====

Re:Fireboard Poll-System RC4 release

Posted by Toolcrazy - 2008/05/17 07:45

Can anyone just email me this file? This is getting old quick. MeadiaMax is still offline.

=====

Re:Fireboard Poll-System RC4 release

Posted by Toolcrazy - 2008/05/18 10:56

Trying not to be a pest, but I really need this mod. Anyway you can put the file somewhere else till mediamax gets the head out of their..... Thanks Much

=====

Re:Fireboard Poll-System RC4 release

Posted by iosoft - 2008/05/18 11:01

Hi,

I understand you situation.

Well, I was stupid that I kept the only copy in that server... and now I lost it.
My own server has the poll system but it is totally customized for my server which will not work with your server.

Be patient, I will recompile the package again this week.

=====

Re:Fireboard Poll-System RC4 release

Posted by Toolcrazy - 2008/05/19 09:44

Thanks much. I will be waiting patiently.

=====

Re:Fireboard Poll-System RC4 release

Posted by PsymonPsays - 2008/05/19 20:06

I've been waiting patiently for a while too. Luckily I was able to find another website hosting the file. Click here to get it FB_Poll_RC4.zip. I've downloaded it but haven't tested it yet to make sure it's legit so download at your own risk.

I am getting ready to install it so if all is good I'll post back up here with the results.

=====

Re:Fireboard Poll-System RC4 release

Posted by iosoft - 2008/05/19 20:25

I have already uploaded the updated version 4.0.1 here -

http://www.gigahertz.net.in/index.php?option=com_content&task=view&id=83&Itemid=86

Don't use the older version posted in the above link.

=====

Re:Fireboard Poll-System RC4 release

Posted by PsymonPsays - 2008/05/20 00:07

The one I posted was for RC4 too, but I'm going to use yours instead lol. I feel safer getting it from the source instead of a website in a language I can't even read. B)

=====

Re:Fireboard Poll-System RC4 release

Posted by ApoKalypse - 2008/05/20 02:37

how to install this poll in forum ?

is this compatible with fb 1.0.3 ?

what is the version of MySQL ?

=====

Re:Fireboard Poll-System RC4 release

Posted by tactics - 2008/06/17 03:54

It is 4.0

Dose it need to be 5.0?

Re:Fireboard Poll-System RC4 release

Posted by tactics - 2008/06/17 23:59

Ok, hope you get better

I tried on MySQL 4.0 and I got the following error:

SQL query:

```
ALTER TABLE jos_*** ADD fb_poll_type tinyint( 1 ) default NULL COMMENT 'Define the type of FB Poll.'
```

MySQL said:

```
#1146 - Table '*****.jos_***' doesn't exist
```

???? It does exists :(

You can help when you get better

Edit: on my site this is the error when I try to save the poll info:

Error, insert query failed

Re:Fireboard Poll-System RC4 release

Posted by iosoft - 2008/07/12 10:20

waiting for FB1.0.5. Then I will release the new version that will solve this problem faced by 1% of users.

if possible, pls, give me full access (FTP to /components/com_fileboard and basic user-login access) to your site so that I can test my new version before releasing.

I don't face any of this problem in my local system, test-site and my live-site. So, can't understand where the problem is ;)

Help me to help you and all others....

=====

Re:Fireboard Poll-System RC4 release

Posted by kingBT - 2008/07/12 12:34

I hope that the Poll-System will be J1.5.X compatible, and that it will be ported to the future FB 1.1.X, so that we will not lose the poll database data.

Re:Fireboard Poll-System RC4 release

Posted by iosoft - 2008/07/12 12:52

It is bad and insulting to use SPAM email to get some good things. My site is not a porn site nor a fraud site.....

I ask for registration only because people using my hacks get updates as soon as it is ready.

your a/c has been banned and don't expect any support from me for you.

=====

Re:Fireboard Poll-System RC4 release

Posted by kingBT - 2008/07/12 13:49

:)) you are verry strange guy.

I didn't want to insult you but I use spambog on almost every site (IT`S MY OPTION WHAT EMAIL ADRESS I USE - EVERYONE IS FREE TO MAKE WHAT HE/SHE WANTS AND U CAN NOT PUSH HIM/HER TO DO ANY THINGS)

I can say more but...

P.S.: CHANGE Ur ATTITUDE AND THINKING UR NOT A LITTLE CHILD...

Re:Fireboard Poll-System RC4 release

Posted by darragh - 2008/07/21 22:07

iosoft,

What are the issues in using this with Joomla 1.5?

Is there much work to make it work with Joomla 1.5?

Thanks
Darragh

Re:Fireboard Poll-System RC4 release

Posted by iosoft - 2008/07/22 09:21

One should not used it with J1.15.
Few work to be done but not enough time....

also I paused all FB related developments till BoJ brings new Stable version of FB.

Re:Fireboard Poll-System RC4 release

Posted by darragh - 2008/07/22 13:00

iosoft,

Are you waiting for 1.1 to be stable before doing any development?

1.1 should natively support Joomla 1.5.

I see that your code is under CC no-Derivatives, would you let me alter the code to see if I could get it working with Joomla 1.5?

Thanks
Darragh

Re:Fireboard Poll-System RC4 release

Posted by iosoft - 2008/07/22 21:15

NO, I am waiting for FB 1.0.5 (Stable) or FB1.1 or FB2.0, whatever comes first.

YES, you can alter the CODE and if successful use it on your website, don't distribute it personally, email me the changes (email address is in the source-code), I will fix it on the next release.

Hope you understand me.

Re:Fireboard Poll-System RC4 release

Posted by ronildo - 2008/08/07 18:38

Error...

I guess have any error on:

templates/default/message.php line 197

```
if($poll_id>0) include_once($_SERVER."/components/com_fireboard/template/default/plugin/poll/showpoll.php");
```

The var "\$_SERVER" dosent work, I have a website in a subfolder.... and a have any errors, when I delete "\$_SERVER" the poll works fine.

Re:Fireboard Poll-System RC4 release

Posted by iosoft - 2008/08/07 19:04

It has been already corrected. But still thanks for your input.
waiting for FB 1.0.5 to be released.....

sorry for duplicate post: Plz see the following post.

Re:Fireboard Poll-System RC4 release

Posted by sunnyjey - 2008/09/05 09:38

Hi guys,

I would like to know what is the status of this FB Poll system with newest FB release 1.0.5RC1

I have hacked-Poll-FB 1.0.4 on our site. Should I upgrade to newest release of FB? If yes which method do you recommend 'converter' or manual-uninstall and then install?

Is there anyone who has updated poll with this latest fb versions without any errors?

Thank you

Re:Fireboard Poll-System RC4 release

Posted by iosoft - 2008/09/05 13:51

Hello,

FB Poll System releases only for stable versions of FB.
RC or BETA or Naughty editions are not supported.

Wait for FB1.0.5 Stable.

SORRY.

Re:Fireboard Poll-System RC4 release

Posted by sunnyjey - 2008/09/05 14:43

Thanks buddy..

I will wait for the FB stable version as per your suggestion

Re:Fireboard Poll-System RC4 release

Does anyone know if you can use this in conjunction with the "subscribe to forum" hack. Has anyone tried?

Thanks!

Fireboard Poll-System RC4.1 release

Posted by iosoft - 2008/11/05 22:43

New version of Fireboard Poll-System RC5 is coming soon.

There will be 2 Editions -

Free Edition - This will be same as the current version of RC4 edition but with many bug fix and compatible with both Joomla 1.0.x and Joomla 1.x.
But this will work only with Fireboard's Default Template.

Professional Edition - This is a much powerful, versatile version with huge numbers of features. Like -

Cool jQuery AJAX and Visual Effects.
Advance Voting Options.
Different Charts (Bar-chart or Pie-chart or Both).
Voter's Info
Personal Support to integrate with any Fireboard Template (implementation only).
.... and many many more.

Price: 25USD per site.

=====

Re:Fireboard Poll-System RC4.1 release

Posted by johnnydement - 2008/11/05 23:30

It's cool you decided to turn commercial, I would make all personal support only for commercial version, if, as said, this is to stop all the repeated questions.

Although I find 25\$ is not a fair price ;)

=====

Re:Fireboard Poll-System RC4.1 release

Posted by iosoft - 2008/11/06 08:16

^ please suggest me what price should I set ? I am noob is this :p

NOTE, the price is for both the advance script and implementation on any FB-Template.

Also NOTE, if I set \$25, I will end up with \$18 after all kinds of tax by my govt, my bank, exchange conversion....

Thanks.

=====

Re:Fireboard Poll-System RC4.1 release

Posted by Toolcrazy - 2008/11/06 08:23

I think he was joking and hinting it was too low. For a small script like this, I think it is about right. JMHO
