
PM system what should I choose?

Posted by Arcanjo - 2007/12/25 21:29

Hi!

I need some help and I dont know if this is the right plase so if its the wrong place sorry!!

I want a PM system..I like clexuspm but I cant seem to find it anymore...if thats not possible can someone help me find a PM system like clexus or as visible apealing like plexus is??

Merry Christmas!
Arcanjo

Use any of the PM systems supported bu Fireboard that suits you. It's all personal preference. Clexus is no longer available.

Or wait 2 months and go with FireMessage - an open source rewrite of the old Clexus.

Hello,

I have installed pms advanced but it does not appear in the FB configuration options.

Is there anything else I should do?

Thanks

Re:PM system what should I choose?

Posted by sadel - 2007/12/28 08:59

Yes you need to tell fireboard that you have a PM installed.

Go to FireBoard Configuration panel > Integration > Enable private messaging, and set it to "myPMS II OpenSource".

To manage the settings for the PMS enhanced, go to > Components > PMS enhanced > Config

There you can view, delete or change setting for the component.

Is there a reason Primezilla is not featured in Fireaboard?

Re:PM system what should I choose?

Posted by grumblemarc - 2007/12/28 15:17

Probably because it needs a hack to work.

I would wait for Firemessage.

"Firemessage will be coming soon, and be ready around February."

Has FireMessage been scrapped? No news on it and I can't find a link to the 'Coming Soon' page anymore.....
