
Remove \"Powered by Fireboard\"

Posted by layal - 2008/01/02 20:51

i'm sure this has been ementioned before somewhere but looked for over one hour without luck :unsure:
My question is: Are we allowed to remove "Powered by Fireboard" at the bottom of the forum?????
tnx

I think you can but for the love of the open-source spirit, you shouldn't:laugh:

Give credits where it's due;)

Under the terms of the GPL license that Fireboard is using the powered by logo can be removed so long as the credits

are not removed from the code itself. This does not require authorisation from the admin as the project surrendered control to the community by using this license. But I don't see why you would want to remove it as its hardly noticeable.

so how can we do this?
what specific code in the fireboard.php?

you can do that in in /components/com_fireboard/fireboard.php
look for the following & and uncomment the lines:

```
echo '© Copyright 2007  
Best of Joomla, ' . _JJ_POWEREDBY  
' FireBoard';
```

(this was in the old version, it should be something similar)
