
Login Box 1.0 for Fireboard

Posted by viet4777 - 2007/08/07 11:24

Demo:

http://luyenkim.net/home9/index.php?option=com_fireboard&Itemid=88889095

<http://www.bestofjoomla.com/images/fbfiles/files/profilebox-eceadec19ae7e7192ab87684adf19060.zip>

the page you logged in/out will remain.

More Info & How to install.

Upload the file over

`components/com_fireboard/template/default/plugin/profilebox/profilebox.php`

And (optional) put `css.txt` content into your default `forum.CSS` in Fireboard Backend.

Re:Login Box 1.0 for Fireboard

Posted by viet4777 - 2007/08/07 17:41

Ok, don't worry!

Add a definition for it:

```
Define('_ANN_ANNOUNCEMENTS','Announcement'); //in english.php
```

OR

```
Define('_ANN_ANNOUNCEMENTS','Your translated words'); //in yourlang.php
```

in language file such as Joomla root/administrator/components/com_fireboard/languages/english.php or yourlang.php.

Re:Login Box 1.0 for Fireboard

Posted by dannykill - 2007/08/13 19:41

Awesome dude!!!

one small error i have though :(

check out the image below if that isn't good enough quality check the link in the post too!

<http://www.manchesters-armed-defenders.co.uk/error.gif>

the problem is that i use the 1.0.2RC2 version at the minute and well the login hack you provided sort of breaks the module where i have the banner and breaks the avatar section, well it doesnt break it it just isn't as neat and tidy as it was, there are now no separators between the banner and the avatar!!

thanks

Danny <http://www.bestofjoomla.com/images/fbfiles/images/error.gif>

Re:Login Box 1.0 for Fireboard

Posted by viet4777 - 2007/08/13 20:48

The old one is checked by 1.0.2 RC1.

http://www.bestofjoomla.com/images/fbfiles/files/profilebox_rc2.zip

Here is the modification for 1.0.2 RC2 :laugh:

=====

Re:Login Box 1.0 for Fireboard

Posted by viet4777 - 2007/09/07 03:32

http://www.bestofjoomla.com/images/fbfiles/files/profilebox_1.zip

Here is the modification as your request. It works for FB 1.0.3 Stable.
Only one file, I use some class form Search box for formating the form in Login & logout.

have fun!

Re:Login Box 1.0 for Fireboard

Posted by klaatu - 2007/09/07 11:37

This is just what I'm looking for. But when I try it, it comes out rather strange, and the button doesn't log me in. I'm using Fireboard 1.0.3 and Joomla 1.5 RC2. Is it the version of Joomla which is the problem?

<http://www.bestofjoomla.com/images/fbfiles/images/loginbox.jpg>

Test again.

Thanks a lot, but this don't work ok.

The text for the "login button" is "Go" always (even if you have other language than english).

When you are logged in, the "welcome message" is not correctly showed. It justify to right, in a small space, and the space reserved for the avatar is too big.

But I take your 1.5_RC2_2 version, put the new code you add in this last version for the "remember check", and now it works perfect for my, thanks. ;)

Here is the modified version....

The only you need to do is to upload the file profilebox.php to the
components/com_fireboard/template/default/plugin/profilebox directory on your server, updating the existing file (I
recommend to rename better than overwrite it).

=====

Re:Login Box 1.0 for Fireboard

Re:Login Box 1.0 for Fireboard

Posted by Vlijmpje - 2007/10/22 05:21

Nicely done.

But after login it still says hello guest so it doesn't log me in.
also i can't see a register link only the forgot password link.
I have community builder also so there is a connection missing during login.
I hope you can fix this because i'm not into php programming.

Greetings Vlijmpje

Re:Login Box 1.0 for Fireboard

Posted by bizperson - 2007/10/22 17:20

I installed your modified version of the profilebox file. Everything looks good and it's exactly how I want it to look, but the
logout button doesn't seem to work properly. I'm not sure whether there's something in Fireboard that is causing this or
whether it's my Joomla installation (using Joomla 1.0.13).

When I press the logout button in Fireboard it doesn't log me out it takes me to a page with another logout button and a
back button (see attached image).

When I press the logout button on this page nothing happens.

Where is this page coming from. I'm sure I've been able to logout in the past with the Joomla login box. But now even that is not working. And after removing your file and replacing it with the old file, I still can't logout.

Do you have any ideas what could be causing this problem?

I've Tried Firefox and IE6.

<http://www.simonyoung.co.uk/images/samscreenshot.JPG>

Re:Login Box 1.0 for Fireboard

Posted by viet4777 - 2007/10/23 02:44

Try Pepin's link with "remember me":

http://www.bestofjoomla.com/images/fbfiles/files/profilebox_1_5_RC2_3.zip

Or my modification without "remember me":

http://www.bestofjoomla.com/images/fbfiles/files/profilebox_1.zip

Note: This works for Joomla 1.0.13 (maybe will work 1.0.x) and FB 1.0.3.

Re:Login Box 1.0 for Fireboard

Posted by triplefour - 2007/10/23 03:25

hi bizperson,

i think you are getting this message cause you are logged into the admin area.

ie.<http://www.yourdomain.com/administrator/>. log out of your site completly then login only in the forum. then try the logout . this should work. I sometimes get this message but only when i logged into the backend.

Re:Login Box 1.0 for Fireboard

Posted by bizperson - 2007/10/23 12:11

Hi viet4777,

I have just tried both of these versions and still have the same problem.

Hi triplefour

It was a good idea. I tested it out by logging out of my windows login and logging into my site frontend on another unused windows login. But still get the same problem.

If it's any help when I go back to the original version of fireboard and press the login link, I get taken to a page saying

"You are not authorised to view this resource.
You need to login."

Re:Login Box 1.0 for Fireboard

Posted by Artisan - 2007/11/08 14:51

I'm still getting the same problem, but looking at slhawk98's instructions here it seems I need to change the Itemid, but I can't find the code containing the "Itemid at lines 190 and 193.

The two lines are:

```
$loginlink = "index.php?option=com_fireboard&Itemid=88889095";
```

```
$loginlink = sefRelToAbs( 'index.php?option=com_fireboard&Itemid=88889095' );
```

I've searched profilebox.php for "fireboard" and "Itemid" - any idea where these lines are?

Malcolm

Re:Login Box 1.0 for Fireboard

Posted by mkorayt - 2007/11/25 21:32

Hey thank you for the code :)

I have some problems with the css i'll be happy if you can help me.

I am using fb 1.0 and loginbox 1.0 with default grey theme

After adding the css for loginbox i still see that the joomla theme's css overrides the loginbox css (I am not selected the use joomla style in FB settings)

You can check my site's forum at

http://www.anadolugezgini.com/gezgin/index.php?option=com_fireboard&Itemid=45

and login with this test user

login : test

pass : test123

I would like to change the background of loginbox area. Normally it's white (cccccc).

Thanks again hope you'll answer soon as i'm leaving it with loginbox enabled.

Oh almost forgetting is it possible to leave the user on the forum page after logging out instead redirecting to main page?

Thanks

=====

Re:Login Box 1.0 for Fireboard

Posted by Shey - 2007/12/12 01:25

Here is an update to Viet's mod

Changed layout to closely resemble default login module layout, and now the "Remember Me" box is unchecked by default. This works great with 1.0.13 and FB 1.0.3.

Posted by nanaya - 2008/02/17 11:05

THanks For the Hack.. Looks good on my Site.. only thing.. I try to log in its still wont let me, It's login back to Guest. So i have to still have to login the usual way through the top menu on the right that says "CONNECT". Seems like when I never added the Hack, the Original Login link was my homepage it doesn't link to the CB login . Could that be the problem? Cause my memebers are loggin in the CB login. then it's integrated to Fireboard. Just theres too much Login links. Some members get confused on my site. Heres the forum link of my site with your hack on it.

Posted by MCM - 2008/02/20 15:00

Hi,

Thanks for your work on this mod.

I've installed the version from a few posts above this and all seems well. I have been very impressed with the support that has been provided.

I have selected the cb integration from admin side but when I click on the 'Register' link I am still sent to the usual Joomla registration. I reinstalled the original profilebox and was taken to the cb register page so I know the system works.

Is it the mod or me? I thought about comparing the register codes with the idea of taking the bits that worked from the original and pasting it into the mod but it became a little confusing.

If I have missed something please let me know, or advise me on how to get the mod to work with cb registration.

Many thanks

=====

Just adding that this is confirmed to work with

Joomla! 1.5.3
FireBoard 1.0.4 Stable

and

Joomla! 1.5.4
FireBoard 1.0.4 Stable

hope that helps someone :)

Re:Login Box 1.0 for Fireboard

Posted by jbourque - 2008/08/30 09:13

Thanks Viet4777 for some great code I have made some more changes to be used with version: 1.0.5NB10
http://www.bestofjoomla.com/images/fbfiles/files/profilebox_fireboard105.zip

Re:Login Box 1.0 for Fireboard

Posted by jbourque - 2008/08/30 09:39

Well did not run as expected it looked fine until I login then I get the top menu showing I am logged in then it shows the login box and guest below.

And for some reason it completely breaks my template and removes all the formating so back to the drawing board to figure it out because I really would like to get this working again.

Any thoughts would be appreciated.
Joe
