
Upgraded and now my posted images dont work

Posted by Arcanjo - 2008/01/07 08:47

Hi

Im having serious problems after upgrading to 1.0.4 all my posted imagens I allready runed the sql script here http://joomlancode.org/gf/project/fireboard/scmsvn/?action=browse&path=%2Fdevelopment%2Freleases%2F1.0%2FUpgrades%2FFireboard_104_html_cleanup.sql&revision=542&view=markup&pathrev=542 but still dont works

but if I put the link here the images look correct nad the strange characters disapear

But it works here!!!

<http://img61.imageshack.us/img61/4995/04008001vy9.jpg>

here is the link of one edited post and the result (happens to all imagens)

<http://www.oficinadosanimais.com/images/best.jpg>

<http://www.oficinadosanimais.com/images/best1.jpg>

Please I need some help because I dont know what to do!!

Ok!

I have solved this... running that script that I mencioned above adaptating to my needs..

after all my http I had &#-58; so I change all to : and all the &#-46; for .

Now Its good..I think!

Arcanjo

Edited because the codes that I changed here are automatic converted..(why not in my forum???)
I had to put - this to work here
