
phpbb3 project?

Posted by mattpist - 2008/01/08 21:50

hey sorry, but i read on here somewhere that someone was working on a phpbb3 to fireboard conversion script. anyways, i just wanted to offer my help, but i can't seem to find the post/user that was working on this. anyways, if that person could get in contact with me, that would be great.

thanks!
