
Upgrade Problems Need Help Fast

Posted by BlueBerry - 2008/01/11 01:19

Meanwhile I am updating my board from 1.0.0 to 1.0.4

http://warda.at/index.php?option=com_fireboard

This is my problem , what should I do?

Pls help me fast many Users are waiting :(

I get the problem but now i've got another problems -.-

Inside the Threas on top, this error get shown

Warning: Invalid argument supplied for foreach() in
/home/www/web112/html/1/components/com_fireboard/template/default/fb_pathway.php on line 140

Only 2 things that I know of cause foreach() errors. Language file issues and most importantly incomplete database upgrades.

http://warda.at/index.php?option=com_fireboard&Itemid=183

Everything is empty and these 2 error ...

what should I do?

Empty? I don't understand.

Please read this for starters.

I solved the error , but on the Top of the Page is this:

Warning:

main(/home/www/web112/html/1/components/com_comprofiler/plugin/language/default_language/default_language.php)
: failed to open stream: No such file or directory in /home/www/web112/html/1/components/com_fireboard/fireboard.php
on line 228

Warning: main() : Failed opening

'/home/www/web112/html/1/components/com_comprofiler/plugin/language/default_language/default_language.php' for
inclusion (include_path='.') in /home/www/web112/html/1/components/com_fireboard/fireboard.php on line 228

That's a Community Builder error. Make sure you configure it properly and all necessary modules are installed.

white modules i need and white configure

=====

Re:Upgrade Problems Need Help Fast

Posted by grumblemarc - 2008/01/11 17:10

??? White = What?:S

Warning:

main(/home/www/web112/html/1/components/com_comprofiler/plugin/language/default_language/default_language.php)
: failed to open stream: No such file or directory in /home/www/web112/html/1/components/com_fireboard/fireboard.php
on line 228

components/com_comprofiler=COMMUNITY BUILDER.

He wanted to say "wich modules and wich config"

=====

Re:Upgrade Problems Need Help Fast

Posted by grumblemarc - 2008/01/11 17:23

Ah!

Make sure that you have Community Builder actually installed and setup correctly, including the cblogin module.

=====

Re:Upgrade Problems Need Help Fast

Posted by BlueBerry - 2008/01/11 17:55

But we use a other Modul "mod_login"

=====

Re:Upgrade Problems Need Help Fast

Posted by grumblemarc - 2008/01/11 18:02

It's in the CB package that you downloaded. I don't think it would be provided if you weren't supposed to use it with CB. Maybe you should check the install instructions and also visit the Joomlopolis forums since I'm not a CB "expert". On the sites I install CB I also use the cblogin module instead of the "stock" Joomla one for full compatibility.
