
Solved: Feed title and descriptions

Posted by StefanPapp - 2008/01/13 17:32

Feed content description:

If you want to put some better feed content description in your header, because 'com_fireboard' or 'com_fbfeed' don't really describe your Feeds, then change this:

Fireboard 1.0.4: In ../components/com_fireboard/sources/fb_rss.php in line 72 replace:

with your content description text.

...hmm the code blocks don't really seem to appear, so if this could help, here are the code replacements.

Best Regards
StefanPapp

...sorry got the wrong category. Please move this to "Solved IssuesThreads"
