
Integrate the new topics with a weekly newsletter

Posted by classixuk - 2008/01/16 20:15

I would love to see a plug-in for Fireboard that enabled me to send out a weekly newsletter of the recent updated posts and or topics on my fireboard forum.

I currently use yANC to email all of my registered users (898 of them), and right now I have to manually insert the topic titles and links etc.

I will also post on the yANC forum to see if I get a response.

;)
