
Redirect to FB profile after topic subscription

Posted by chris2005 - 2008/01/17 23:20

When subscribing to a topic fb 1.0.4 goes to the fireboard profile page after some seconds. I'm using CB profiles so this is not correct behaviour for this matter. I would like to have the destination page to be the cb profile instead.

"CB profile" in fb is set to "yes".

Re:Redirect to FB profile after topic subscription

Posted by klette - 2008/01/29 00:03

I have exactly the same problem.... Posted it some weeks ago, nobody answered.

=====

Re:Redirect to FB profile after topic subscription

Posted by Hazzaa - 2008/01/29 00:15

It's not a problem, but rather the way the developers thought it should work. As I said, I will get on this as soon as I have a few minutes.

Re:Redirect to FB profile after topic subscription

Posted by Hazzaa - 2008/01/29 02:04

Here is the best I can come up with at this time.

In view.php, FIND

```
func=myprofile&amp  
and change to
```

```
func=view&amp
```

There are 4 instance of this, be sure to change all four. This will redirect to the front page of the forum instead of the profile. I know it's not perfect but it is better than the profile page especially if you are in CB. With a little time, I will figure out how to direct it to the link. The issue I am having at the moment is when I redirect to the link, it puts a heavy strain on the server. I will need to find the proper link to direct to the post.

This may take me a bit of time to get to but should help your situation as a temporary fix

the same problem with me.. how do i remove amp; in the email link to the users..... if we removed amp; the the problem will solved...it will directed u to the topic subscription... can somebody tell me which file do i need to edit ? :huh:

/index.php?option=com_fireboard&Itemid=54&func=view&catid=42&id=74#74

Re:Redirect to FB profile after topic subscription

Posted by Hazzaa - 2008/01/30 21:21

We were not talking anything about any email.

What we are referring to is in the forum,when you subscribe/unsubscribe to a topic, the forum redirects you to your profile. When using CB this would redirect you to CB profile. What I have done is redirect it to the front page of the forum which is better than redirecting to CB profile. I'm trying to redirect back to the post to which a user has subscribed/unsubscribed from.

So can you please explain what you are referring to in the email and since it is different than the discussion here, perhaps start a new topic, including the issue and what you are trying to accomplish

Re:Redirect to FB profile after topic subscription

Posted by janpirate - 2008/01/30 21:28

sorry misunderstanding.. i'll start a new topic.. :lol:

Re:Redirect to FB profile after topic subscription

Re:Redirect to FB profile after topic subscription

Posted by gottafish - 2008/01/31 05:20

Am I misinterpreting something?

The problem I am running into is that, after subscribing to a topic (or setting a favorite), I am redirected to the FIREBOARD profile, not the CB profile. All integration settings are set to use the CB profile. Any direct profile links go where they should.

Is this the correct behavior given the settings to use th CB profile?

Redirecting to the front page is an ok "interim" fix (as stated) but redirecting to the "right " profile is ok too...

Re:Redirect to FB profile after topic subscription

Posted by Hazzaa - 2008/03/04 12:43

I just finished an install of J1.5 and here are my results and configurations

Configuration #1-A

J1.5 NEW INSTALL

FB 1.04

CB 1.1

CB-FB plugin 1.1

OWN DESIGN TEMPLATE

Everything works as it should. When you subscribe or unsubscribe you are forwarded to CB Profile

Configuration #2-A

J1.0.13 (Test site old install and many hacks, components and modules)

FB 1.04

CB 1.1

CB-FB plugin 1.1

OWN DESIGN TEMPLATE

Everything works as it should. When you subscribe or unsubscribe you are forwarded to CB Profile

Configuration #1-B

J1.5 NEW INSTALL

FB 1.04

CB 1.1

CB-FB plugin 1.06

OWN DESIGN TEMPLATE

Redirects you to FB Profile OOOOOPS

Configuration #2-A

J1.0.13 (Test site old install and many hacks, components and modules)

FB 1.04

CB 1.1

CB-FB plugin 1.06

OWN DESIGN TEMPLATE

Redirects you to FB Profile OOOOOPS

So everyone having this issue, chances are you are using the OLD CB-Plugin V1.06 and this is your culprit. Please upgrade your little butts to cb.Fireboard Plugin ASAP and all your worries will go away.

SHeesh and to think I spent all day yesterday looking at code and most of the night setting up test sites to find a simple answer like that.

Have fun and enjoy your fix ;)

I've just uninstalled the 1.0.6 plugin and installed the 1.1 plugin from the link included in this thread.

Here's what I get....

When I click on the "subscribe" button in a thread it is not taking me to my CB profile, but is taking me to this (which I assume is the FB profile page):

http://www.gbacos.com/static/sub_step2.png

If I unsubscribe from either the thread or from the "forum" tab in my CB profile it will send me back to my CB profile BUT is makes a stop here first:

<http://www.gbacos.com/static/step2.png>

If I click the "click here" it will take me back to my CB profile, but if I click any of the links on the left (ie "summary") it takes me to the FB profile (same as above).

Can anyone else confirm this? or tell me what I'm doing wrong? (fyi... no other hacks installed for J1.0.15 or FB and I've set this back to the default_gray template to eliminate the numinu template as the source of this behaviour.)

Thanks again!
Neale

BTW, Hazzaa, is the numinu template link that I provided above your work???

Re:Redirect to FB profile after topic subscription

Posted by Hazzaa - 2008/03/04 22:25

It initially DOES take you to the FB profile but then it refreshes AGAIN and takes you to the CB profile. It need to go the FB pages to pick up the subscribe/unsubscribe. If you leave it for 3.5 seconds 3500 milliseconds, it WILL take you to the CB profile.

Re:Redirect to FB profile after topic subscription

Posted by neale - 2008/03/04 22:37

Hazzaa wrote:

Hazzaa,
Thanks for the quick response. It does the redirect only on the unsubscribe. During the subscribe process it is not redirecting, but goes directly to the FB profile (I've let it sit for several minutes at least).

I just mentioned the "but if I click any of the links on the left (ie "summary") it takes me to the FB profile" because I know

some users won't wait the 3.5 seconds... :) That being said, my only real issue is the "subscribe" process does not redirect, but rather "parks" on the FB profile.

It sounds like DMA is confirming this behavior too.

Thanks,
Neale

Re:Redirect to FB profile after topic subscription

Posted by DMA - 2008/03/04 22:47

Yep! :)

=====

Re:Redirect to FB profile after topic subscription

Posted by neale - 2008/03/04 22:49

Ok...I stand corrected. On the subscribe it goes to this page:

http://www.gbacos.com/static/sub_step3.png

For the 3.5 seconds before it goes to the FB profile. But, it is (at least for me) still going to the FB profile and not the CB profile (with the 1.1 plugin installed).

Sorry for the bad information earlier...:(

Neale

Re:Redirect to FB profile after topic subscription

Posted by Hazzaa - 2008/03/04 22:50

Let me look into things and see what I can figure out for you.

Also I have a website called Joomlame.com. I try to maintain all the support their and makes it hard for me to remember what I'm working on. If any of you would like to post these issues there, it would be great.

That said, I'll see what I can't figure out for you guys.

In the meantime, my test site is unaoa.com. It gets reloaded on a regular bases. So if you want to go there, signup, and subscribe and unsubscribe, you'll see that the second redirect IS taking you to the "CB profile.

=====

Re:Redirect to FB profile after topic subscription

Posted by Hazzaa - 2008/03/04 23:07

neale, The numinu template found on this site is not by me. If you go to Joomlame.com, the work there is by me. There are several links on this site under the original numinu thread that I had posted a lot of links to fixed files. The ones now available on my site are much more stable.

Hazzaa wrote:

DMA, I've activated your account at unaoa.com

Thanks Hazzaa!

I tested it but unfortunately I'm getting no redirect from the FB profile.

The only time I get redirected to my CB profile is when I unsubscribe to a thread.

I would be more than happy with no redirect at all, meaning when the user subscribe/unsubscribe to a thread all he see is:

<http://www.bestofjoomla.com/images/fbfiles/images/screen.jpg>

No redirect, no profiles.

The user himself need to choose topic or forum.

Is this possible?

Re:Redirect to FB profile after topic subscription

Posted by emstalk - 2008/03/26 19:15

I am still having a problem with it going to FB profile when I favorite or subscribe to a thread. I was initially running the

older cb fireboard plugin and changed over to the latest 2.0 beta. I am running Joomla 1.0.15 with akodarkgem template, CB 1.1, Fireboard 1.0.4.

When I unsubscribe from a thread in my CB profile, It will redirect back to my CB profile like I want, however on the page where it says I have been unsubscribed and that it will redirect me, it still shows part of the FB profile.

When I unfavorite a thread however, there is no redirect back to CB profile, It just stays on the FB profile.

Any ideas on a fix? Thank You

Re:Redirect to FB profile after topic subscription

Posted by tdog09 - 2008/04/06 23:40

Hey guys-

I think I may be on to a quick hack for this...working on removing the redirection entirely after clickng subscribe.

Will report back soon! (God I hope this works!)

Re:Redirect to FB profile after topic subscription

Posted by Andy - 2008/04/07 02:28

Yeah I just noticed this issue the other day and have been searching the forum for a fix. There must be other threads on this surely?

Re:Redirect to FB profile after topic subscription

Posted by Thoeri - 2008/04/07 02:44

Hi

yes, there are several threads on this but there is no-one with any kind of solution. I have been browsning this forum for a few months trying to find it. And am surprised that the developers has done absolutely nothing about this serious issue even though it has been known since day 1 of the release of 1.0.4. I guess they just want to sell templates nowadays ;-)

I think we just have to hope that tDog09 is on to something here.

Cheers,
Thoeri

Re:Redirect to FB profile after topic subscription

Posted by Andy - 2008/04/07 02:55

yeah I kind of agree with you however I think we will find it will probably be fixed in the next release whenever that may be. Iv noticed that around here they seem to ignore issues but solve them in the next version. Which is fair enough i suppose:(

Re:Redirect to FB profile after topic subscription

Posted by tdog09 - 2008/04/07 03:02

Hey guys, update-

I believe i got it!

Instead of having the site redirect to the FB profile when clicking "subscribe" I made it so that it just displays the fact that the subscription has been processed, then stays on that screen and gives links to "return to the topic" and "return to the forum". No redirections at all. The same works for clicking "Unsubscribe", "Add to Favorites" and "Remove as Favorites".

I believe I could of made it redirect to the actual CB profile, but I liked it better this way.

I want to check a few more things before I release the code (don't wanna release something that doesnt work!).

If you wanna see what it looks like or help out and do a quick test or 2 check out my dev/test site at www.pearlcanvis.com. Report your findings back here on BOJ. I have a testing account setup as:
username: tester1
password: test

I noticed that the issue still appears when any of the mentioned actions is taken from the CB Forum Tab plugin. I guess i'll have to work on that next. Actually, does anyone know what the latest release version of that is and how to tell? If there's a newer version of it that has the fix that would be great!

Re:Redirect to FB profile after topic subscription

Posted by Thoeri - 2008/04/07 03:26

Hi

I think it works as you said. Personally I would prefer a redirect back to the post after a few seconds. But his is way better than the original issue. I found that it worked well with the redirect from the CB forum tab. I clicked unsubscribe on a topic - I got the display that this was processed and then I got redirected back to the cb profile page. Exactly as it should be in my opinion. But I could see the FB profile page in the background during the process message. But I could live with that ;-)
)

Thanks for all your efforts!
Thoeri

Re:Redirect to FB profile after topic subscription

Posted by tdog09 - 2008/04/07 03:59

I can see why the site should redirect you to the CB profile, but only when the unsubscribe and remove favorite is accessed from the cb forum tab. But when these buttons are clicked from an actual thread, i would think it should not go to the CB profile as that is not where u just were.

In any case, i really choose this route as for me its unexceptable for the fb profile to be displayed at all, even if it's only for a few seconds. I can see users being like, "oh, what's that, let me click on some of these things". I don't want my users seeing the FB profile at all.

Also, I'm seeing with the fix I implemented, when you click unsubscribe from all, it is no longer working. I'll have to look into this more.

Re:Redirect to FB profile after topic subscription

Posted by Andy - 2008/04/07 04:02

Its good to know somebody is taking the time to try and fix this issue. thanks alot mate!

Re:Redirect to FB profile after topic subscription

Posted by tdog09 - 2008/04/07 04:23

can someone tell me when you try to unsubscribe from all in the CB Forum Tab if it actually unsubscribes from them all?

Mine doesnt seem to be working, even before my changes.

Thanks.

Re:Redirect to FB profile after topic subscription

Posted by Andy - 2008/04/07 04:48

no its not working all it does is simply redirect me to the firebord profile!

Re:Redirect to FB profile after topic subscription

Posted by tdog09 - 2008/04/07 05:07

well, that seems to be another bug we've found, though its not a fireboard issue, but the cb plugin issue.

Re:Redirect to FB profile after topic subscription

Posted by Andy - 2008/04/07 05:25

its a good job my site isn't live yet of id have to disable the subscribe functions altogether!

I'm not sure- mine doesn't work, but I thought it was because I hacked at it. I read somewhere others had trouble with that, so it might not have worked anyway. My favorites works.

You might be interested that I modified the plugin so that it will reflect subscribed categories, too. Here's the link to the thread where I posted my code. It works for me; YMMV.

http://www.bestofjoomla.com/component/option,com_fireboard/Itemid,38/catid,68/func,view/id,46705/#46705

Re:Redirect to FB profile after topic subscription

Posted by tdog09 - 2008/04/08 03:30

thanks phleum.

I decided to remove the Unsubscribe From All & Remove All Favorites from the CB Forums Tab as it was not working at all for me and I can do without it. If a new release comes out with it working then i'll pick it up then.

I've made other changes to the tab as well. Now, the Unsubscribe and Rempve Favorites links in the Tab work the same way as it does when doing so from the Forum Thread itself.

To fix the issue of whether to go the CB Profile or not, I just added a link to give the user the choice of going to thier profile, back to the thread, or the forum.

To check it out or to do a quick test, go to my test site. I gave all the info in a prev post. Let me know what you find.

=====

Re:Redirect to FB profile after topic subscription

Posted by malexs - 2008/05/24 04:42

Ok so this is the second time im writing this little bit seeing as there was some issues posting it...?

Using CB on my site i dont want users to ever really see that there is a FB profile page as well as a CB page... so this fixes some of the things mentioned in this thread, but honestly there are probably more cases where this could be an issue.. the templates really need an overhauling.. The modifications I made however are designed to still be usable if you dont use CB integration. ie. if you use CB, then the FB user profile page will be hidden, but if you dont use CB, then it will be displayed. That way, i hope at least, that these changes can be used in the default templates..

I describe the changes i have made below but i have also attached the files in a zip file so all you have to do is replace the myprofile.php file and the post.php file mentioned about in this post and you have all the mods :)

The only thing i havent looked at is the unsubscribe from all/remove all favourites options from the CB profile tab,its late and im tired so im going to bed.. hope you guys enjoy this and that it works for you ..

on a side note.. i do find it odd that there is so much code in the templates.. must make templating a real bother..

=====

The issues fixed here are with Fireboard 1.0.4's integration with CB. There are 3 different things that I have changed.

PART 1

The user is not returned to their CB profile after removing a favourite or a subscription from their CB profile tab. To fix this, in the `\template\default\plugin\myprofile\myprofile.php` template file replace line 561 and line 598 which look like

```
setTimeout("location='index.php?option=com_comprofiler".FB_CB_ITEMID_SUFFIX."&tab=getForumTab", 3500);
```

with this code instead

```
setTimeout("location='index.php?option=com_comprofiler&tab=getForumTab", 3500);
```

PART 2

Also, if you want to have FB use the CB profile, then you dont want the user to see the FB user profile menu options, which displays for 3.5 seconds while it shows the user that they have been unsubscribed/unfavourited from a thread. To fix this, make the following modifications to `\template\default\plugin\myprofile\myprofile.php`.

First lets remove the left user panel on the fireboard user profile if the user has enabled CB.

at Line 99 add

so that it looks like

and at line 113 add

so that it looks like

Now lets remove the fireboard user profile summary if the user has enbled CB
right after "// B: Summary" (around line 123) add

```
if (!$fbConfig) {
```

so that it looks like

```
// B: Summary
if (!$fbConfig) {
    if (file_exists(JB_ABSTMPATH . '/plugin/myprofile/myprofile_summary.php'))
```

and then right before "// F: Summary" (around line 135) add

```
else {
    echo 'set Timeout("history.go(-1);",3500);'
}
```

so that it looks like

```
}
else {
    echo 'set Timeout("history.go(-1);",3500);'
}
// F: Summary
```

PART 3

To set FB to return to the previous post after adding a favourite/subscription instead of fireboards user profile, make the following changes in \template\default\post.php at line 1092 (for subscribe) and shortly after at line 1117 (for favourite)

Replace

?>

```
setTimeout("location=", 3500);
```
