
Am I being stupid? Where are the Modules?

Posted by garysumpter - 2008/01/17 23:52

Hi all.

I used to use Joomlaboard and like the 'latest posts' and similar modules.

Do they not exist for FireBoard? They werent with the downloads and I cant find anything?

Many Thanks

Gary

Check on extensions.joomla.org, there have been several versions of such modules from time to time I'm sure you'll find more than one solutions.

They were here before the upgrade to 1.0.4. I wish that they would put them back up.

I guess I'll join the ranks of the Stupid, because every download link I try is broken or missing. If anybody has a mirror of the popular modules, please post it. Reason #2302 why I love JoomlaForge!

Which Modules are you referring to?
Top of the page, click "Downloads"
Left Half of the page "Fireboard Files"
They all seem to work.

Modules. Not just files. Modules. And specifically the "Latest" posts/discussions/etc. Modules. All of them appear to be dead links. I challenge you to prove me wrong! LOL! ;-)

As I asked, "which modules were you looking for". I can point you to 1700 + modules with links that work but with out you specifically say which one you want, it's kind of hard to direct you.
Kind of like stopping in the street to ask for directions to "some place", 10,000,000,000 possibilities.
Now I challenge YOU to prove me wrong B)

Now that I know http://extensions.joomla.org/index.php?option=com_mtree&task=listcats&cat_id=1886&Itemid=35
here ya go

So a Google Search of mod_fblatest.zip turned up a few more. All but ONE of the modules in the Joomla! Extensions directory had broken links.

The only one that was downloadable from the Extensions directory was Moolets, which is bloatware and self-aggrandizing (big logo that links to the moolets site).

So far... I am still adrift.

No problems, did you find what you were looking for? :)
