
Vanilla -> Fireboard. Anyone =\

Posted by Kastang - 2007/11/14 20:02

I am looking for:

1)A DB converter for Vanilla that will convert the whole database (Users and Posts etc) to Fireboard DB format.

Thanks.

Bump.

The only solution I have found so far is to convert Vanilla to phpBB then phpBB to Fireboard. The Vanilla to phpBB script is crudely written and requires manual SQL injects. I have gotten most of it working, but it has been a pain to get the discussions in the right forums etc.

Anyone happen to have a Vanilla -> Fireboard convert script done or in the works =\
