Hi johnbo88,

So how did you solve the problem? My Fireboard Forum is having similiar problem. The posts are partially in bad Chinese Characters. And the user's signature displays in bad character.

please help:

I am using fireboard 1.0.4 and I got the same problem. What is word warp?

this is a fireboard limitation, it can only handle a short paragraph (it would mess things up if the paragraph is, say, over 300 characters).
