## Link to a forum topic from main page article

Posted by annabanana - 2008/01/23 06:57

---

Does anyone know how to do this? I saw it on <http://www.maxconsole.net/>  
I love how you can read more on the article OR go to the discussion in the forums, it takes you directly to that topic. I mean I can do it manually but that would take quite a bit. I guess I would have to create the forum topic, AND then create the article, then provide a link to it.
