## colour changing

Posted by j\_thomo - 2007/04/30 22:20

---

Hi,  
i know people have already asked these sort of questions before but i can't seem to figure it out.

Is there any way i can change the colour (bars) to a light blue on my dorena template? as they are currently red and dark blue.

Thanks  
Jamie

You need to edit the images found in the dorona/images folder. There are 2 that you should edit, topmenusep.gif and thread\_bg.gif.

Are you sure this is how to change the colours, because there are very small lines when i look at them in the image viewer. If so how to i edit them?

Thanks  
Jamie

Any image editor can do it. Paint even if you need to. Just zoom in, there are some color variations within the images you'll want to preserve.
