
Wrong Itemid

Posted by edenaar - 2008/02/10 15:23

I am struggling for quite some time now but haven't found the solution yet.

I've installed the Fireboard Latest module from:

http://extensions.joomla.org/component/option,com_mtree/task,viewlink/link_id,2351/Itemid,35/

The topics of the latest posts are shown on my homepage:

<http://www.edenaar.nl/index.php>

But when you click on a topic you don't get anywhere. Because the Itemid is wrong. It says it's '1' but it should be '32'. You can check this on the homepage of my forum:

http://www.edenaar.nl/index.php?option=com_fireboard&Itemid=32

Does anybody know how to fix this?
