
Expert Search?

Posted by Knalltrauma - 2007/04/18 10:45

Wow! This board completely bombs Joomla :laugh: Absolutely great!!!

Would be nice to have an "expert search" in the future (like phpBB & SMF). The integrated search from Joomlaboard is quite unusable :laugh:

Best regards from Switzerland

We have it, but half done :) it is already in the code.

I understand you well, as we did this because we were sooo frustrated with other solutions :)

Hey Maria

Thank you for your swift reply! Great news! I'm looking forward to this feature :-)

Wow. Joomla is really making huge progress this year with such additions as the new JCal Calendar Component and now Fireboard. Glad to hear the search function is in the works.

Any progress on this topic?

Re:Expert Search?

Are you serious? You just revived a 9 month old topic. What do you think?

That's why I ask, I looked in:

http://www.bestofjoomla.com/component/option,com_fireboard/Itemid,38/func,view/id,17058/catid,3/ and could not find anything about it.

So I guess, there is no progress about this then?

Re:Expert Search?

Posted by grumblemarc - 2008/01/22 19:59

I brought this up 2 days ago in a thread asking for the advanced search feature to be implemented since there seems to be a folder in the install called advancedsearch. It looks like work was started on it but never finished.

Re:Expert Search?

Posted by Thobbe - 2008/01/22 21:02

Thank You for the answer.

I DID a search for it before I asked, and the latest one regarding Advanced Search that I found was from 2007/10/30.

Maybe there wont be any advanced search then.

Hmm

To bad!

I don't think this is what is being said. What I am understanding is that the feature for advanced search is there but has not yet been implemented. This could mean that the developers have started the work on it but for some reason have set it aside to work on other things.

To me this could mean that they ran into some sort of issue and decided to put this feature on the back burner for now. I'm sure it will be coming in the future.

I looked into the code for the advanced search plugin a couple of months back when I was modding the default search function. It seemed like a Turkish coder started it and got to the input fields--which is not far at all. If enough people are interested in this feature, I can make it my next pet project.

Re:Expert Search?

Thank You for a great answer.

Me, as one, are of course interested in this function that really should be built in by design for a modern forum i think.

That would be great and I'm sure many will use it.

I lifted the front-end interface of phpbb for ideas about what the advanced function should do and will start building the function based on that. If you guys have more ideas/requests for options, speak now. Here's the interface:

http://www.gossper.com/index.php?option=com_fireboard&Itemid=27&func=advsearch

Posted by gomjabbar - 2008/02/02 19:46

Sorry, the links I posted last week required registration to access. Was not intended. I moved the project to my beta. You can see the front interface here:

http://www.gomjabbar.net/index.php?option=com_fireboard&Itemid=64&func=advsearch

Re:Expert Search?

Posted by Hazzaa - 2008/02/02 20:01

I can see it LOL. Thanks gomjabbar
Is the code available for use?

=====

Re:Expert Search?

Posted by gomjabbar - 2008/02/02 20:07

Hold thy horses. This is just the form menu. There's no function behind it yet. I'm just putting it on there so people can suggest other features that they feel an advanced search should have. Think of it as a dynamic project proposal. The writing and testing of this piece of code will take a lot longer than half the day I've spent so far.

OOOOPS. I'd be happy to help test this. I have several fully functional test sites to play with. Let me know and I'm pretty good at trouble shooting code. I can't code from scratch but can trouble shoot it. ;)
