## Loyalty / Rewards component

Posted by jwjpkkj - 2008/02/17 03:27

---

Im after a component for this - Ive done a search and cant believe something has not come up!

Have I missed something?

:)

---

Thanks for the link.

That component is pretty good, but I think I want something a bit more automatic. Something that adds up the number of posts etc a user makes and they get points. For example, if a user makes 50 posts in the forum, they get 10 points (and then eventually they would be able to redeem them in my shop.

I have developed a hack for this but not been able to make it display. It adds and subtracts points according to posts, karma, views on their profile and several other things. I am but a couple of days from completion. I'll post here when it's complete.

Would love to have this. I think it would boost posts on our forums.

If the team allows, this could be a nice feature for FireBoard. Some rewardssystem called FireAward or somthing. You can collect points thourgh FireBoard, plugin support for other components, etc.

Birger :)

---

When I try to install the component I get the following errors:

Upload component - Upload Failed  
ERROR: Could not find a Joomla! XML setup file in the package.

Upload component - Failed  
Installation file not found:  
/home/hansonfo/public\_html/site/media/install\_48f3688f285ed/

I am doing it through the administrator panel and uploading the zip file.

I am running Joomla! 1.0.13 Stable and fireboard.

---

Any ideas?

Thanks

Jo <http://www.hansonforums.net>
