
Edit Markup Based on Usertype?

Posted by evixketh - 2008/02/22 11:22

Hi all, I'm kinda new to Fireboard, but I'm wondering if there's a way my moderators can edit posts, both their own, and others, without the edit markup being shown, but when a regular user edits their post, the markup does show.

Hope that makes sense. Thanks in advance!
