
Quick reply open on every post. FB 1.0.4

Posted by grumblemarc - 2007/12/24 19:37

Upgrade went without a hitch. Only one issue layout wise. I didn't see it in the config but is there any way to keep the quick reply text area closed until clicked on? Edit: You can click on the Quick Reply button and close it but shouldn't it be closed by default?

Re:Quick reply open on every post. FB 1.0.4

Posted by jarobles - 2007/12/24 19:51

just upgraded to the latest FB version.. i didn't experience that,, maybe its a conflict between your joomla template and fireboard template.. the 1 thing i experience is the date,, not displaying correctly

Re:Quick reply open on every post. FB 1.0.4

Posted by danialt - 2007/12/24 19:55

Please read the wiki about the release (RTFM ;))

@jarobles

language files are changed in 1.0.4. You need to upgrade your language files as well.

Re:Quick reply open on every post. FB 1.0.4

Posted by jarobles - 2007/12/24 20:00

language file not included on FireBoard_1.0.4_Stable_PatchFiles.zip???????

If you have other than English, not. Please read the wiki.

Re:Quick reply open on every post. FB 1.0.4

Posted by grumblemarc - 2007/12/24 20:04

Nothing in the wiki on quick reply. May be a template issue after all. I'll check it on the next upgrade.

Re:Quick reply open on every post. FB 1.0.4

Posted by danialt - 2007/12/24 20:10

I'll add it. It is a JS conflict problem.

jquery - see known issues in the release notes - and Merry Christmas!

Re:Quick reply open on every post. FB 1.0.4

Posted by grumblemarc - 2007/12/24 20:25

Ah! Didn't even think about that!

Re:Quick reply open on every post. FB 1.0.4

Posted by grumblemarc - 2007/12/24 20:27

Yup! Known issues covers it. Feel like a noob again.

Re:Quick reply open on every post. FB 1.0.4

Posted by rodvold - 2007/12/24 22:27

I'm feeling pretty technically challenged right now.

The solution to this problem is remove all the occurrences of "any" other jQuery.js library, for example delete the line from ClexusPM mambot, that are older than 1.2.1 and using only one instance of jQuery.js, preferably the one shipped with FireBoard.

Checklist:

Only 1 jQuery file is loaded and the version is higher than 1.2.1
jQuery.js is on the top of all other Javascripts loaded in the page
You might have to refresh the browsers cache to see the problem go away.
jQuery and jQuery.packed.js (minified) are the same, just lower in size

I'm using a rockettheme template and am trying to find out what I need to do. If I find this "line" and remove it I won't have any errors will I? If anyone else is having the same issue could you let me know where I go to find it?

Sorry for the nubness :unsure:

Re:Quick reply open on every post. FB 1.0.4

Posted by grumblemarc - 2007/12/24 23:19

When I find the "fix" I'll let you know. Still searching and tweaking.

Re:Quick reply open on every post. FB 1.0.4

Posted by rodvold - 2007/12/25 03:40

Thank you. In the mean time, does anyone know how to disable quick reply?

=====

Re:Quick reply open on every post. FB 1.0.4

Posted by MSFREAK - 2007/12/25 04:14

I have this too, i would love to go back to FB 1.0.3 but i dont think this is possible >.

since I turned off kama this problem disappeared

=====

Re:Quick reply open on every post. FB 1.0.4

Posted by grumblemarc - 2007/12/25 05:46

I wished that worked for me. I think I'll give up for now. I've looked everywhere I can think of to "remove all the occurrences of "any" other jQuery.js library" but have found nothing to remove. The problem is slightly different on each site.

Merry Christmas all!

Re:Quick reply open on every post. FB 1.0.4

Posted by grumblemarc - 2007/12/25 15:31

Cool that fixed it. But on this one site the quick reply doesn't work anymore.
www.john-levene.com

Also I noticed that Multithumb no longer works correctly. None of it's lightbox or popup functions work.

Since this was a low traffic site i simply removed the quick reply button altogether.

Anyone wanting to do this needs to go into message.php in you default template folder and remove/comment out the following after applying the change mentioned above;

Edit: BOJ hasn't upgraded apparently.
find the span that starts with this (around line 326 for me) and delete the whole span (line 341).
span id = "fb_qr_sc__"

This is a bit drastic but I don't know why the QR doesn't work on this site and does on another.

Re:Quick reply open on every post. FB 1.0.4

Posted by jasonrhl - 2007/12/28 14:50

what fixed it?

that link just gives me

/home/pastebin/public_html/./posts/ needs to be a writable dir to use file storage engine

Does anyone have a fix for using versatility theme by rockettheme

could shoutbox affect it?

=====

Re:Quick reply open on every post. FB 1.0.4

Posted by grumblemarc - 2007/12/28 15:01

pabstein seems to be having prolems. THAT was not the fix.

=====

Re:Quick reply open on every post. FB 1.0.4

Posted by grumblemarc - 2007/12/28 15:05

Line 199 (or thereabouts) make sure it looks like this
div id = "sc" class = "switchcontent" style="display:none;"

Edit: It's stripping characters. Just make sure to add style="display:none;" to the end of the line.

=====

Re:Quick reply open on every post. FB 1.0.4

Posted by jasonrhl - 2007/12/28 15:17

can we add something like this to site template?

or what ever the .js is meant to be

=====

Re:Quick reply open on every post. FB 1.0.4

Posted by grumblemarc - 2007/12/28 15:19

That's being worked on. This file is in the default template folder so in essence you'll be adding it to the template.

=====

Re:Quick reply open on every post. FB 1.0.4

Posted by jasonrhl - 2007/12/28 15:26

stupid thing stripped my code

=====

Re:Quick reply open on every post. FB 1.0.4

Posted by jasonrhl - 2007/12/28 15:48

My idea didnt work anyways.

seems well above my level of experience to resolve this problem.

good luck to everyone with this problem who is trying to fix it.

jasonrhl wrote:

can we add something like this to site template?

I had the same problem with my custom template written for 1.0.3 originally. The default template works fine... after some digging I found the problem in the CSS. The fix is rather simple: open forum.css in your template folder, and search for `span.fb_qr_fire{}`
`div.switchcontent{}`

change it to:

```
span.fb_qr_fire{  
.switchcontent{display:none;}
```

=====

Re:Quick reply open on every post. FB 1.0.4

Posted by mraab - 2007/12/29 07:58

Hmmm..., I am getting a bit confused now:

hypnotoad, the css file looks already as you state it.

danialt, as stated before, I can't access <http://pastebin.com/f3bd0a1aa> either. Same error message.

I am using Versatility III from RT too. Any help appreciated.

Thanks,

Matthias

Re:Quick reply open on every post. FB 1.0.4

Posted by jasonrhl - 2007/12/29 09:59

I assume that both developers with hope that the other will resolve this. I guess I will be looking for another template. Im finding lots of compatibility problems with lots of components and plugins now. Wonder if 1.5 joomla will fix any of this.

Why are we having the js conflicts?

=====

Re:Quick reply open on every post. FB 1.0.4

Posted by fxstein - 2007/12/29 10:22

Matthias & Co,

We have made Danials fix permanent in SVN 535

Here is a link to the file:

http://joomlancode.org/gf/project/fireboard/scmsvn/?action=browse&path=%2Fdevelopment%2Freleases%2F1.0%2Fcomponents%2Fcom_fireboard%2Ftemplate%2Fdefault%2Fmessage.php&revision=535&view=markup&pathrev=535

You can download it and see if it helps.

Hope this helps!

Oliver

Hmmm.. I was just about to do the upgrade, think I should maybe hold off on this a bit until things are more stable than 'stable' release? I'm not the world's best at troubleshooting things... without making matters worse, that is... :)

=====

Re:Quick reply open on every post. FB 1.0.4

Posted by mraab - 2007/12/30 01:49

Hi grumblemarc,

fb's upgrading tutorials really work. If you follow their instructions step by step, you shouldn't have any problem at all. And if you upgrade from 1.0.3+, you simply copy the files across onto your server.

If the feature discussed in this thread occurs to you too, simply replace the message.php file in com_fireboard/templates/default/ with the content fxstein linked two posts up.

That's all.

=====

Re:Quick reply open on every post. FB 1.0.4

Posted by imaax - 2008/01/31 19:44

Hello,

I have used the updated file and it seems to have worked well for removing the Quick Reply box, however now the Quick Reply button does not function any longer.

I read Grumbelmarks post about removing all the Quick Reply button code from the message.php is this the only answer for this problem?

I also looked in the Wiki and it mentions something about fixing this but I did not understand what it was telling me to do.

Can someone point me in the right direction for fixing this broken Quick Reply button?

Thanks in advance.

If the fix exists elsewhere please post the URL here.

Re:Quick reply open on every post. FB 1.0.4

Posted by mtstrooster - 2008/02/23 12:33

Same problem as imaax.. Inserted the new 535 message.php file and it removed the automatically opening quick reply, but just as him the button doesn't open it up :(Help?

Re:Quick reply open on every post. FB 1.0.4

Posted by TauTau - 2008/02/23 16:21

I manually edited messge.php and it worked. QuickReply also still works.

=====

Re:Quick reply open on every post. FB 1.0.4

I edited what was mentioned here... in messages.php in the default template dir

=====

Re:Quick reply open on every post. FB 1.0.4

Posted by mtvrooster - 2008/02/24 22:19

Oh, bummer.. I already did that.. Didn't make it work :(All that did was get rid of the always-open quick-reply, button still busted (IE cannot get the quick-reply to OPEN now).

=====

Re:Quick reply open on every post. FB 1.0.4

Posted by TauTau - 2008/02/25 01:29

ok, I have to admit I never tested IE... I just ignore the majority of the net ;)

=====

Re:Quick reply open on every post. FB 1.0.4

Posted by mtvrooster - 2008/02/25 13:38

No no, I mean IE as in In Example, not Internet Exploder, heh).. But tnx for trying at least.. No idea why it won't open at all now, but I suspect the reason it won't open has to do with the reason it was staying open (and the button wouldn't close it at that time either)....

=====

Re:Quick reply open on every post. FB 1.0.4

Posted by TauTau - 2008/02/25 14:39

there seems to be a different problem then, because my always-open-quick-reply-boxes were closable then...

=====

Re:Quick reply open on every post. FB 1.0.4

Posted by celius - 2008/06/11 05:56

Hmm.. I applied the "fix" here: <http://pastebin.com/f3bd0a1aa>

The quick reply box was then removed from all the post messages. But the quick reply button does not work. Have anyone finally gotten this to work the way it should?

=====

Re:Quick reply open on every post. FB 1.0.4

I tinkered with it for awhile and never got anywhere with it. At the time, I decided that having quick replies NOT pop up automatically was more important than actually having functional quick replies.

The good news is that with the re-write of much of the code for 1.1.x that's in alpha now, hopefully issues like this will be long forgotten :)

=====

Re:Quick reply open on every post. FB 1.0.4

Posted by fxstein - 2008/08/03 11:42

This is also permanently fixed in the upcoming 1.0.5 release.

=====

Re:Quick reply open on every post. FB 1.0.4

Posted by mtvrooster - 2008/08/05 10:29

Just to clarify, which part of it has been correct, or all of it? Meaning..

Of course my assumption tells me that the posted was applied to the FB code removing the quick-reply boxes to all pop up.

But for many (all?) of us, doing this 'fix' also completely disables the Quick-Reply button. Does the button now function properly, or will we be in the same situation we are in now?

=====

Re:Quick reply open on every post. FB 1.0.4

Posted by oraclesoon - 2008/08/22 10:52

I was playing with rt_populus fireboard template and I also experienced this quick reply box always opened issue.

Software:

- Joomla 1.0.15
- Fireboard 1.0.4
- fireboard_theme_populus.rar from RocketTheme rt_populus version 1.0.0.

I compared both

components\com_fireboard\template\populus\forum.css
components\com_fireboard\template\default\forum.css

I think we need to make sure the following:

div.switchcontent{} at line 107
div.switchcontent{display:none;} at line 120

Re:Quick reply open on every post. FB 1.0.4

Posted by grinchy - 2008/08/22 17:01

That fix was already given 8 months ago in this thread.

http://www.bestofjoomla.com/component/option,com_fireboard/Itemid,38/func,view/id,35479/catid,79/limit,10/limitstart,20/#35571
