
Error message appears in latest posts module

Posted by jlimbo - 2008/03/09 07:44

When a user is editing their CB profile, the following error messages appear in the latest posts module

Notice: Constant `_RANK_ADMINISTRATOR` already defined in
D:\www\vhosts\localhost\TrentWing\administrator\components\com_fireboard\language\english.php on line 790

Notice: Constant `_RANK_MODERATOR` already defined in
D:\www\vhosts\localhost\TrentWing\administrator\components\com_fireboard\language\english.php on line 791

I'm using Joomla 1.5, CB 1.1 and FB 1.0.4. I'm guessing it may have something to do with not having the cb plugin available as for some reason this won't install.

Any help is appreciated

Thanks
John

Maybe this would work to install the CB PLUGIN, it worked for me.

U must modify the server settings as described in the link. Problems with CB PLUGIN installation are common to WAMP.
If U modify the `.htaccess` and `php.ini` it must work to upload the PLUGIN.

Can U install other CB PLUGINS? or there is a problem only with the FIREBOARD PLUGIN?

What error gives the CB on PLUGIN installation failed?

Did U `chmod 777` the folders used by CB?

Other plugins are fine. I'm getting the message "Error! Could not find an XML setup file in the package." Permissions are ok.

If U tried to install CB plug-in for Fireboard version 2.

Did U replaced the default one as described on the authors page?because CB has a default one, and this one is a newer version (v2). U must install it following the instructions provided herehttp://portal.lucazone.net/index.php?option=com_docman&task=doc_details&gid=47&Itemid=99999999 I think this is the problem. :)

That plugin only works on fb 103. I'm using fb104 on joomla 1.51. I've now got the 1.0.4 patch working but am still having the same problem, though the error masseage is now displayed on a blank page when the latest posts module is published

I don`t know what to say, maybe it wont work because of J1.5.1. I have J1.0.15, FB 1.0.4, CB 1.1 & CB Fireboard Plugin 1.0.2 (2beta) and everything works fine.
