## Voting on the topics in the forum

Posted by kricschen - 2008/03/11 03:37

---

Is it possible to have a voting mambot for topics in the forum.

Similar to <http://bbs.clutchfans.net/forumdisplay.php?f=9>

it let people know which topics has more interests.

Yes, Vbulletin and phpBB have this feature. Is this feature in the future plan of fireboard? i.e. allow people to rate the topics.

thanks,

I would be very interested in this type of feature as well.

Basically when a person searches for a forum entry they could be asked if the post was helpful. Is what I am looking for.

THanks

SMF has this too, and you can choose whether to turn ratings off or on by topic.

Funny... I was just looking for this exact option myself. I guess it's not a default so I didn't miss any config screens.

---

This would be an excellent plug-in.
