## Danish translation "light" 1.0.4 stable

Posted by walaw - 2008/03/15 20:10

---

Hej there!

Iv'e just updated my danish translation file for FIREBOARD 1.0.4 STABLE  
Iv'e copied all new parts from the 1.0.4 english.php to the 1.0.4 danish.php  
Iv'e JUST TRANSLATED FRONT END-TEXT(most important for me). New features in the backend still talk english, but doesn't look ugly anymore (it does if you have the old danish.php).

-----  
**INSTALLATION:**

After upgrading to FIREBOARD 1.0.4 STABLE or installing FULL FIREBOARD 1.0.4 STABLE, do this:

1) download link: [danish-language-fireboard-104-stable.zip](#)

2) unpack/unzip [danish-language-fireboard-103-stable.zip](#) (with unzip on linux / winzip on windows)

3) upload/copy `../administrator/components/com_fireboard/language/danish.php` to:

`/joomlaroot/administrator/components/com_fireboard/language/`

4) upload/copy `../components/com_fireboard/sources/fb_timeformat.class.php` to:

`/joomlaroot/components/com_fireboard/sources/`

5) upload/copy `../components/com_fireboard/template/default/message.php` to:

`/joomlaroot/components/com_fireboard/template/default/`

-----  
**IMPORTANT:** Translation is NOT finished (especially not for the back end!)  
But it works fine here - if you experience any errors in the translation - post here.

Regards, Ole (walaw) [http://www.bestofjoomla.com/images/fbfiles/files/danish\\_language\\_fireboard\\_104\\_stable.zip](http://www.bestofjoomla.com/images/fbfiles/files/danish_language_fireboard_104_stable.zip)

=====

If you replace Danish characters with standard HTML codes (å instead of &aa etc.) you will avoid character set problems.
