
BestofJoomla Community Builder Profiles!

Posted by niker345 - 2008/02/03 05:27

Hi there i was just wondering how you guys got your community builder profiles to look so good?

Did you create a new template?

Modify one? Do you have files?

Your profiles look awesome can you help me out?!

It's not Community Builder. It's custom code. NOT available for download.

When do you think there will be a viable solution for integrating FB with CB? Currently it's a hack to get them to work together.

Thanks

Perry

I don't know. When do you think I'll win the lottery?

Seriously. You're talking about 2 different developer groups with 2 separate and distinctive projects with 2 entirely different roadmaps with practically ZERO known communication going on between the two groups towards the purpose of integration. How long do YOU think it will be?.

Hello isoft,

that would be great!!!! :woohoo: :silly: :woohoo: :silly:

Best wishes, Roland
