## JoomSuite Content – content management tool for Joomla 1.5

Posted by kingBT - 2008/02/03 11:40

---

I thought that this would be a replacement for MYCONTENT...and it seems 2 be a nice replacement.:)

lol, oh great! Well what is this site using to do all the cool functions? The dig style articles, linking to Authors, template gallery with specific details that can be filed out by a user. Is their components to do this? Or is this site highly coded by pros?
