
Hide certain forums?

Posted by Linsyn - 2008/03/19 03:17

Hello. I'm going out of my mind trying to get certain forums to be seen by higher rank users, however anyone can see them as long as they're registered. I made my moderators as high a rank as admins, and I tested it on a test acct of my own that has registered only status, and even after clearing my cache, cookies, and history, it still shows me all forums when I log on with this test acct.

Anything that I'm missing?

Use GroupJive. If you're using Joomla 1.5 you may be out of luck.

Excellent, downloaded it along with Community Builder as well since I didn't have it, integrated everything together and now it works the way I wanted it.

Thanks again.
