
Annoying flashing ad

Posted by science - 2008/03/21 02:28

Hard to believe you are allowing the extreme annoyance of the ijoomla ad. It is painful to experience while trying to make use of *your* site. You are likely loosing more activity than you gain in money from them.

I had just received an email sale offer from them, and was about to make a purchase, but have now decided otherwise. No way am I going to do business with a company that subjects people to such pain!
