Fantastic Support. Very Fast. Great Design. Very Happy

We decided to use a template from JoomlaJunkie.com as the design was perfect for our business model, allowed us to get our site up in less than a week and everything we had heard, had been good.

After we launched our site, we noticed there was a delay as the site loads. I submitted a request via the member forum and less than 24 hours later, JoomlaJunkie were on the case and had it sorted. I really am Very Very happy.
