
topic icons

Posted by Tabbris - 2008/03/24 17:36

Hi I'm new to all of this. I've sent up fireboard 1.0.4 and my only problem is:

when you click on post message all the topic icons are there but they are not aligned directly underneath each other. The check boxes start on the same line as the icons and then they go into the correct line but its confusing.

I've tried going into the edi CSS function, but I've had no luck. How can I get the icons and the check boxes aligned with each other?

sorry to repost but I just can't figure it out. Can someone point me in the right direction even if its just where I should look in the CSS file.

Thanks
