
siteground23

Posted by Rhodes - 2008/03/26 04:37

Hello,
I have installed this template with success, but I would like to change the top banner with my name , is it possible?
cheers:(

Download the template... change the name of the Direcory and the name in the file templateDetails.xml

then change the image which can be found in Template/Template Name/Images/ folder you can edit the jpg and or edit the template and check the links etc in the index.php

and re-upload the new template and all files to new directory. (or zip up and install the standard way)

this way when you upgrade Joomla it won't over write your template

????
That banner/header looks like an image. Open (unzip) the template up on your desktop. Locate the template images folder. Locate the banner image. Swap out yours with that one. Upload the new image to the same location on the server and overwrite the existing one.
