## avatar error

Posted by lazy boy - 2008/03/28 13:19

---

Hi,

I've installed the latest version of fireboard 1.0.4 and i'm getting this error on the "my avatar page"

Warning: asort() expects parameter 1 to be array, null given in  
public\_html/components/com\_fireboard/template/default/plugin/myprofile/myprofile\_avatar\_upload.php on line 627

Warning: Variable passed to each() is not an array or object in  
public\_html/components/com\_fireboard/template/default/plugin/myprofile/myprofile\_avatar\_upload.php on line 629

Please help i can't upload avatar.

Thanks,

=====

Same problem here, i get this errors on lines 627 and 629. however.. i can upload avatars, i think you solve that giving the right permissions to the images folder/fbfiles (777)

can anyone help please? these errors are really anoying when the users go into their profiles/avatar page

thank you

I solved the problem....

make a folder inside galley like this ../images/fbfiles/avatars/gallery/sample  
sample is new folder

program look inside gallery and if there is no folder it gives warning

Hi, That worked for me as I was having this problem.

I uploaded some avatars into the 'sample' folder and they appear as a selection for members in a dropdown box along with default gallery (refer attached file). This is fine.

As my default gallery isn't showing any avatars, how can activate this. I have set permissions correctly, or alternatively, delete this and change the name of 'sample' folder to default.

Please upload Default Gallery avatar out of sample folder  
inside .../images/fbfiles/avatars/gallery/

for example your avatar is myphoto.jpg upload it  
.../images/fbfiles/avatars/gallery/myphoto.jpg for Default Gallery

Excellent. That worked well.

Many thanks.

Strange thing, but for me these warnings make the page impossible to load on Internet Explorer 7...

In my opinion, this code should be changed like this:

```
if ($filelist) {
    asort($filelist);

    while (list($key, $val) = each($filelist))
    {
        echo '$val\n';
    }
}
```

So, if no folder exists, only "default" option is displayed.
