To new and old teams - may you merge with harmony!

I really like the new look - very professional.

I hope the nice appearance can be followed up by new features!

Looking forward to stability!

woohoo!

Looks like CB-team is really interested in Fireboard as well!

That makes me quite anxious to see Fireboard closely integrated with CB and GroupJive.:kiss:

Stability will probably bring big appearance changes to quite a few well known community sites... joomlapolis.com included probably...

am i guessing right, nant? ;)

Looking forward to joomlapolis.com new look already :woohoo: hehe

all u guys rock! keep it up!

p.s.

@nant:

will the CB integration for Simpleboard which is existent in CB work with Fireboard as well as is or are there any code changes needed?

Thank you for your comments.

Yesterday I had a talk with Beat and he is going to introduce his "dream" API for both systems. Fingers Xed

don't tell me those things and then just stop!!!! you are killing me!

keep the Info coming... how are the two systems going to integrate in the future then? what did Beat tell u.. make him post here please. that sounds REALLY exciting...:laugh:

...btw... is the template for sending messages going to be fixed in the next FB version? judging by looks that is the only leftover from Jommlaboard...
