
() left overs in vcard

Posted by MSFREAK - 2008/03/31 01:08

Hi,

I have disabled the user stats in the backend of fireboard.

So now it shows:

Username ()

Avatar

online/offline | PM | profile

Now the problem is that next to the username, above the avatar, it would say user or admin.

but i have disabled most of the info things so now it shows : username ()
where () was the place where it would say user or admin like this:

username (user)

So now im stuck with () leftover.

I hope i made it clear, im not very good at this and english is my 3rd language.

Thank you for help :)

You are posting in the wrong section.

I'm sorry for this, I did not know for sure for where it should go.

I also noticed the top of this section says
"Current latest release is 1.0.3 Stable"

Isn't 1.0.4 the latest?

Anyone know how to fix my problem?
