## CB plugin for FireBoard 1.04

Posted by msubob - 2008/03/31 06:11

---

Is there a Community builder plugin yet for FireBoard 1.04? I have a fresh install of FB 1.04 and it will not allow me to upload the prior versions of the CB plugin. Any suggestions?

Thanks,

Robert

What version of CB are you running?

CB 1.1 has a built in Plugin/Tab that you can select either Joomlaboard/Fireboard or AUTO. That would be your best bet for smooth integration rather than someone else plugin.

Check it out!

I'm using CB 1.1. And I didn't even realize there was a built-in tab in FB 1.04. Thanks.

Robert

Hi,

that plugin doesn't plug CB into Fireboard, it plugs Fireboard into CB :)

You can see the headings of your posts, your subscriptions and favorites represented in a tab of CB. If you click on this items, it leads you to the posts in Fireboard.

Greetings  
Mc

So I guess back to my original query-Is there a CB plugin for FireBoard 1.04? And since I'm new to CB, is the plugin beneficial to users?

Thanks again,

Robert

Also wondering if there is a plugin for FireBoard 1.04 as the built in one does not seem to work.

Plugin to do what? The built in plugin I described previously does what pretty much all other plugins do, it links forum post and subscriptions to your profile in a defined spot.

What other kind of plugin would there be? Or are you simply trying to make CB and FB profiles the same? If so all of that is done in the admin panel of Fireboard. If your looking for some other type of integration you will have to be more descriptive.

Thanks,  
James

The simpleboard plugin does nothing at all in the CB profile when i set it up to use fireboard and publish it.

You have three steps you have to do!

1. Go in Fireboard Admin Panel and scroll down to find the "RED" text that says "Build Community Builder Profile Fields"

No problem at all buddy and thanks for the Karma!

Its been a while since I was hitting up the forums here and have hopefully been helpful to some of the members in the last few days. BOJ is a great place to learn new techniques and establish friendships between developers and I highly

---

encourage that. (Makeing Friends)

I am going to open a new post before long which will guide people to some popular web development components that I find and others find useful.

Thanks,  
James
