## posting of dynamic signature bug

Posted by Darkestwish - 2008/03/31 07:36

---

I have a guild site via [www.wowguilds.ca](http://www.wowguilds.ca) which uses FireBoard 1.0.4 Stable.

Me and my members have been trying to post our sig's and keep getting a invalid realm message on the sig once we have pasted it to the sig area in our user profile.

The issue seems to be that our realm name is Vek'linash and for some reason the forum has a issue with the ' in the name of the server. It decides to on its own place 3 frontslash's infront of the ' making the name invalid.

I have tried editing them out and reposting it over and over but it keeps on adding them back.

Is this a known bug or can it be fixed?

Thanks
