
Show from which country is post

Posted by tc001mt - 2008/03/14 18:59

Somebody know if is possible show to all users from which country posting are made?

I try to explain:

Ip address is visible only for administrators and this is very good , but how can i show to all users if somebody write from USA , italy or other country?

I have some people boast of they live in different country from they really write in forum but i cannot publish IP because of privacy ...

Thank you for all help you can give me..

Re:Show from which country is post

maybe i found solution

<http://forums.geobytes.com/viewtopic.php?t=19>

i added it around line 279 of template/default/message.php
i have problem to print ip address.

i tried to subst '\$msg_ip_link.' with '\$msg_ip.' but it don't work

if i write manually ipaddress show city and country correctly

somebody can help me?

Thank you

[solved] Show from which country is post

Posted by tc001mt - 2008/03/25 03:21

Solved i modified components/com_fireboard/template/default/view.php

in attachment ready file version for 1.04

for manual hack you have to add ELSE to

if around line 990 after this

```
//Show admins the IP address of the user:
```

```
modifying
```

```
GeobytesIpAddress&geobyteslocation=$IpAddress
```

```
in geobytes code in
```

```
GeobytesIpAddress&geobyteslocation=' . $fmessage->ip . '
```

remember :

this will show COUNTRY+CITY+IPADDRESS

```
sGeobytesCountry+", "+sGeobytesCity+", "+sGeobytesIpAddress
```

this will show COUNTRY+CITY

```
sGeobytesCountry+", "+sGeobytesCity
```

this will show only COUNTRY

```
sGeobytesCountry http://www.bestofjoomla.com/images/fbfiles/files/view-0dcb648321e80546d99868165669d59a.rar
```

Anyone confirm this works? I'd like to sticky this if it does.
