
vBulletin 3.6.x to FireBoard 1.0.1 - ready!

Posted by bbpixel - 2007/06/10 05:24

I'm very pleased to announce that the vBulletin to FireBoard Converter is ready for beta testing now.

If you want to test on, please email me (huynguyen -at- bbpixel.com), I will send you this script!

After some testing phases, I will uplaod and share (free and open source) this converter for all of our community :laugh:

Regards,
From BBPIXEL

Update Jun 11 2007:

- These have some issues and bugs reported to me, so I will close the beta1 testing phase to fix those bugs! After that I will open the next beta version for download and play on :laugh:

Thank you very much for all of your help!

damn, i saw 'Re:vBulletin 3.6.x to FireBoard 1.0.1 - ready!' , and thought i found an instant converter!

you should change the title to 'beta ready' or something.

any updates on this? as i just noticed its been several weeks

hey there! this looks cool (and better skin than mine :))

can you please put the code somewhere so I take a look? we can work together to make both systems (SMF and VB) get converted better.

you can contact me via the contact section above.

hi!
i was a beta tester of Huy's work... its working... Some problems converting passwords... And an error at the last step. you know vbulletin using a crypt technology like md5(md5.gid)but joomla using only md5... so the vb2fb tool must change joomla's crypting or you must send everyone their new passwords...

Hi,
Any news on this converter? where can i download this script? does it work with Fireboard 1.0.0?

cheers

For me it doesnt matter anymore, as result of the lack of an answer I had to search for my own solution:

1.- vBulletin to SMF

Source: www.simplemachines.org

2.- SMF to FB

Source: http://www.bestofjoomla.com/component/option,com_fireboard/Itemid,38/func,view/id,18672/catid,6/

Then I moved the forum to another server, you can see the process explained here:

Just asleep then... ;)

Is there any progress on it though? Thanks!

so disappointing that no progress has been made on this. I bet there are 1,000's of us who would switch to fireboard if only there was a converter.

I have found that it is available here for download...

<http://forum.bbpixel.com/index.php?automodule=downloads&showfile=30>

I have no idea if anyone has used it successfully and I don't know what version of vb, joomla, sql, php, etc.

Has anyone had any luck with this?

Maybe you might want to contact the author of the script? The website for download belongs to the OP.

this should not be a sticky. Its a real shame that fireboard lacks converters. There are so many of us that want to make the switch but unfortunately its never going to happen.
