
FireBoard DiscussBot Plugin: output: \"{mos_fb_d...

Posted by carsten888 - 2008/04/05 16:51

FireBoard DiscussBot Plugin installed fine and backend seems to work fine. but on the frontend it looks like a mambot is missing.

this is what shows in frontend in an article:
my text {mos_fb_discuss:2} lorum ipsum etc.
