## JoomSEO, Joomla 1.5.2, and Fireboard

Posted by drivenweb - 2008/04/15 03:35

---

Everything seems to be working great except for the Meta Description tag.

Instead of displaying the first bit of the post, when viewing a topic, it displays the first part of the page which is:

Is there a way to fix this?

Thanks!

JoomSEO 1.5.1  
Joomla 1.5.2  
Fireboard 1.0.4  
sh404SEF

Well since the support was kinda non-existent, I had to find a solution myself. I got it to work. Here's how:

I added the following code:

```
//START FIREBOARD HACK
$searchHTML = "";
$found = strpos($text,$searchHTML);

if ($found){
$text = substr($text,$found);
}
//END FIREBOARD HACK
```

I added it to the CleanText function after the following code:

```
$text = html_entity_decode($text);
```

Works like a charm. Might want to include this with the next release?

Hi,  
In which of the files did you make the change ?

Thanks

---

You make the changes in the JoomSEO.php file within /plugins/system

Ive made this edit to the JoomSEO.php file and am still having the same issue where the META description continues to come up as "Community Forum ForumThreaded ViewHelp Welcome, Guest Please Login or Register. Lost Password?"

is there a new variable for the message text for fireboard posts maybe?

this is the hacked area of the JOOMSEO.php file if anyone notices that somthign may be wrong with it.

```
function CleanText($text) {
    // remove any javascript - OLLY
    // http://forum.joomla.org/index.php?topic=194800.msg1036857
    $regex = "]*?>.*?'si";
    $text = preg_replace($regex, " ", $text);
    $regex = "]*?>.*?'si";
    $text = preg_replace($regex, " ", $text);

    // convert html entities to chars
    // this doesnt remove but converts it to ascii 160
    // we handle that further down changing chr(160) to a space
    $text = html_entity_decode($text);
    //START FIREBOARD HACK
    $searchHTML = " ";
    $found = strpos($text,$searchHTML);

    if ($found){
        $text = substr($text,$found);
    }
    //END FIREBOARD HACK
}
```
