## Changing the User Type titles based on post count?

Posted by PDG - 2008/04/15 06:04

---

I am sorry if this has been asked to death, but I don't know what it is called to do a search. My question is in fireboard, depending on the number of posts one has, they get assigned a type like "platinum boarder" or gold boarder" Is there anyway to customize that for a group of users or for individual users or do you have to use only what has been assigned in the code of your template?

Nobody knows anything about this feature?  
Maybe I am not stating it correctly.

Right now, you cannot assign a set of rankings (platinum board, etc) per user type nor is there anyway to assign users to a particular group. Unless you're admin, mod or individually assigned a rank then everyone is in the same type of rankings.
