## Bug: Show-Message Order

Posted by hansvanhalteren - 2008/04/15 11:49

---

I think I found a bug. If this has already been addressed on this forum, please point me to the proper thread.

When a user changes the Show Message Order from Show Oldest Messages First to Show New Messages First then the pagenumbers of the pagenavigator will not work properly.

This is what happens.

Suppose a category has 25 messages. I set the configuration up to show 5 messages per pages. So 1 2 3 4 5 pages are shown when viewwing the category.

When I change the sortorder of messages to Show Newest Messages First then the 5th page is shown first instead of the first page. When I press the '1' page the first page isn't showing however the 5th page is shown again, which means I cannot view the messages on page 1 anymore.

Changing back to Show Oldest Message First clears this problem.

I hope you understand what I mean. My English is not soo good.

I'm on FB 1.0.4 on a Joomla 1.5.2 legacy system.

Hans
