## Upgrading from 1.0.0-beta to 1.0.4 Stable

Posted by traek - 2008/04/21 05:32

---

If you have Fireboard reporting version "1.0.0-beta" do not believe it! ;) You actually have Fireboard 1.0.1 (Beta) and can use the instructions for that version at the Wiki page here:

[http://www.bestofjoomla.net/wiki/com\\_fireboard/release\\_1.0/upgrading](http://www.bestofjoomla.net/wiki/com_fireboard/release_1.0/upgrading).

The instructions work perfectly as is; just make sure you read through them a few times before beginning to make sure you don't miss anything. I was confused with "1.0.0-beta" thinking I had to use the 1.0.0 upgrade instructions and it was really hard to figure out that "1.0.0-beta" = "1.0.1 (Beta)". Silly version reporting :p

Thanks grumblemarc for pointing me at those posts!
