
bbcode to embed video/flash

Posted by cybersans - 2008/04/20 14:41

hello developers team

i want to suggest this feature. i hope that you can consider develop this options: bbcode that will embed videolink, or flashvideo link youtube/googlevideo inside the forum. so that flash video will appear inside the forum rather than have to type the url only.

thank you in advance. B)

The svn551 will exactly do that. Just search for it and install.

notice that. i just patched the fireboard with latest patch from svn. and it working! actually i want to reply this topic yesterday after 10 minutes i create this topic to mention that embedding code is available, but suddenly this website is OFFLINE.

p/s: and i always saw this website in offline mode, because of database down maybe?

this topic can be closed. thank you

Where would one go to find svn551? I tried searching for it and came up with nothing. I would like to be able to embed flash in post via bbcode on a forum I am setting up.

Paul
