
Announcements displaying Hacked when try to add

Posted by brisbanescan - 2008/04/22 07:52

Recently i have noticed that the Announcements part of the forums of 1.0.4 has displayed with a Hack attempt when i try to add an announcement and also when i try to remove Ranks it does not work can anyone please explain why this has been occurring.

Phil

I've noticed the same thing. I'm using CB and Joomla 1.5.

To fix this for the announcements, in com_fireboard/template/default/plugin/announcement/announcement.php, I commented out (add two slashes in front) lines 243-245 like this:

```
if ($do == "add" ) {  
    // if (!$editor) {  
    //     die ("Hacking attempt" );  
    // }
```
