
Indonesian fireboard

Posted by yuliandini - 2007/04/21 16:39

I'm working on an Indonesian translation of the board. Still pretty rough, and it's targeted mostly for the end user (ie. people visiting your site) so the administration language are left pretty much alone.

This is because most of the time I find it easier to understand Internet-related directions in English rather than Bahasa Indonesia (standardization problem).

Anyway, once I've finished, I'll post it in this thread ... and people who wants to also translate the backend can do so from that file.

Cheers,

=====

kewl :)

Btw, ini khan thread indonesia, jadi bahasa indo aja kale :P

Helo,

Avatar sih banyak banget berkeliaran di Internet ;) . Maksudnya buat forum BOJ ini atau buat forum lo sendiri?

Coba aja di google pake keyword "avatar gallery" wah, berderet deh tuh, tinggal milih.

Kalo buat di forum lo sendiri, avatar yang dah lo pilih di-save satu-satu ke desktop lo trus ditransfer ke components/com_fireboard/avatars/gallery lewat ftp.

maksud gw, avatar yang bagus dan sesuai dengan FB ini (tentunya buat forum gue), memang sih kalo di search engine banyak banget, but I need best recommendation. Mengenai upload, gw hanya sekedar memastikan saja kalo mekanismenya sama.

Thanks

Wah kalo cari the best, ga berani kasih rekomendasi dah ... tergantung selera masing-masing n jenis boardnya. Mungkin yang lain bisa rekomen.

Gudlak!

buat yang butuh fireboard dalam bahasa indonesia. seperti saya sebutkan di posting pertama, terjemahan ini difokuskan kepada pengguna akhir.

silahkan upload ke joomla.com/administrator/components/com_fireboard/language/

untuk mengubah/memperbaiki bahasa, anda bisa lakukan pada file ini sebelum diupload, atau sesudah di upload lewat joomla.com/administrator/components/com_fireboard/language/indonesian.php
