
Frontpage Ajax Tabs

Posted by clanspot - 2008/04/23 02:34

Hey Gruble.... can you enlighten me on what Module is being used on the frontpage to display the different templates in AJAX Mode?

Thanks,
James

Who's Gruble?

Check the credits link at the bottom of the page.

Ahh.. I type really fast and I was remote into my home PC from work so the graphics look like water colors.

Unfortunately!!!

Also, the Credits link does not give credit to the Module but instead does the Components used. Any other advice? Do you think Danialt will reveal?

Probably not. More than likely it is a module of the original component ALSO modified. makes sense.
