
\$30 to fix my upgrade

Posted by tswiss - 2008/04/25 09:31

I didn't realize there were instructions to upgrade. I tried to uninstall Fireboard (1.0.0), then upload the 1.0.4 zip file. Next time, I'll go to the directions, but I need some help with the naming of the mysql files (I think this is the problem). Most of the forum seems to have installed, it just can't seem to find the previous forums, who is online, avatars, etc.

I'll paypal \$30 to someone to fix my problem...Tom
