## DB function failed with error number 1054

Posted by millerscd - 2008/04/29 19:21

---

I get the error listed below when I go into the Forum Administrator screen. All other features appear to work. I am running Joomla 1.0.13 and Fireboard 1.0.4. I found a few suggestions about replacing the admin.fireboard.php but that did not work either. Disabling SEO feature in Joomla did not work either.

DB function failed with error number 1054

Unknown column 'g.id' in 'on clause' SQL=SELECT a.\*, a.name AS category, u.name AS editor, g.name AS groupname, h.name AS admingroup FROM jos\_fb\_categories AS a LEFT JOIN jos\_users AS u ON u.id = a.checked\_out LEFT JOIN jos\_core\_acl\_aro\_groups AS g ON g.id = a.pub\_access LEFT JOIN jos\_core\_acl\_aro\_groups AS h ON h.id = a.admin\_access GROUP BY a.id ORDER BY a.ordering, a.name

If you haven't do a search for 1054.

Actually, I have searched for 1054. All roads point to fixes for Joomla 1.5. Unfortunately, the fixes for Joomla 1.5 do not appear to work in 1.0.13. I have seen other forums with the same problem. I have not seen a fix at this point and an upgrade to 1.5 would be a pain in the butt at this time.

If your forum is new, can you try alpha version on it? take backup first.  
It is possible that it takes your joomla as 1.5 (e.g. if you have a library directory under your joomla root)
